Ms. Lynn Dittmer
Metropolitan Area Planning Agency
2222 Cuming Street
Omaha, NE 68102

**Re: South Omaha Brownfields Coalition Assessment Grant
Phase I ESA Update Report
Michael Henery Parcel
2625 Deer Park Blvd., Omaha, NE**

Attention Ms. Dittmer:

The purpose of this letter is to provide a Phase I Environmental Site Assessment (ESA) Update of the Michael Henery Parcel located at 2625 Deer Park Boulevard in Omaha, Douglas County, Nebraska (the "Property") with respect to any changes since the original Phase I ESA report was prepared for the Property in November 2012 that would require amendments to the conclusions of the 2012 report. Figure 1 (Site Location Map) and Figure 2 (Site Diagram) show the location of the Property.

This Phase I ESA Update is being prepared for Mr. Michael Henery and the Omaha Brownfields Coalition and was conducted as part of the South Omaha Brownfields Coalition Assessment Grant being administered by Metro Area Planning Agency (MAPA). A Phase I ESA was previously prepared for this site in November 2012 by Alfred Benesch & Company (Benesch) in general conformance with the scope and limitations of ASTM Standard Practice E 1527-05 (ASTM E1527-05), which revealed evidence of *recognized environmental conditions* (RECs) in connection with the Property in regards to the Omaha Lead Site and the construction date of the Property (potential lead based paint).

Scope of Work

The scope of work for this Phase I ESA Update included a review of the original Phase I ESA, a site visit, owner interview, and a regulatory records review. This scope does not include sampling of air, soil, ground or surface water, or building materials.

The ASTM standard was revised in 2013 (ASTM E1527-13). Significant changes to the standard were made and are discussed in this report. The changes to the standard were considered during preparation of this Phase I ESA Update and are addressed in this report.

Review of Previous Phase I ESA Report

Benesch reviewed the following report prepared by Benesch in November 2012:

- *Phase I Environmental Site Assessment, Michael Henery Parcel, 2625 Deer Park Boulevard, Omaha, Douglas County, Nebraska prepared by Benesch for Mr. Michael Henery and the Omaha Brownfields Coalition, dated November 2012 (2012 ESA Report).*

The 2012 ESA Report consisted of a review of regulatory and historical records (Environmental Data Resources {EDR} report), interviews with the Property owner and occupant and/or local agencies, and a site visit to assess the interior and exterior of the building and surrounding properties. Benesch concluded in the 2012 ESA Report that there was evidence of RECs in connection with the Property and made the following recommendations:

- *Based on the construction date of the Property building (1958), Benesch recommends sampling for lead based paint (LBP) prior to redevelopment or demolition of the existing structure.*
- *Although the Omaha Lead Site (OLS) source areas have been abated, the impact of the OLS on the Property itself is unknown at this time, and may still be significant with regard to either potential contamination or environmental liability. As such the OLS represents a recognized environmental condition for the Property. Therefore, Benesch recommends sampling of site soils for lead contamination to determine what level of control (if any) may be appropriate for the Property.*

The 2012 ESA Report did not identify any other RECs in connection with the Property, and no additional recommendations were made.

Based on the review of the 2012 ESA Report, it is Benesch's opinion that these RECs are still valid and do not need to be updated for this Phase I ESA Update.

Site Visit and Interviews

Mr. Brian Fettin of Benesch conducted a site visit on July 27, 2015. Mr. Fettin was accompanied by the Property owner, Mr. Michael Henery. There were no conditions limiting observation of the Property (e.g. access issues, physical barriers, or weather). However, the fenced cellular tower, which is leased out by Mr. Henery and located adjacent north of the Property building, was not accessed. Based on observations made during the site visit, the land use for the Property and the surrounding properties appeared to be similar to those described in the 2012 Phase I ESA Report. However, the Property building was observed to be empty. According to Mr. Henery, his tenant (Americana Companies) had recently moved out. Mr. Henery stated that nothing else has changed regarding the Property since the 2012 ESA Report was prepared. Site photographs are included as an attachment to this report.

Based on observations made during the site visit, the following observations should be updated for this Phase I ESA Update:

- The building was observed to be vacant. The 2012 Phase I ESA Report indicated that the building was occupied by Americana Companies, a company that specializes in servicing shopping carts.
- The 2012 Phase I ESA Report indicated that an air compressor and numerous 55-gallon drums were observed during the site visit. Nine of the drums were empty, while two contained water soluble paint. Neither of these items were considered a REC for the Property; however, it should

be noted that the air compressor or drums were not observed during the site visit for this Phase I ESA Update.

Regulatory Records Review

The regulatory agency database report, provided by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut, was reviewed for changes regarding reported releases of hazardous substances and petroleum products on or near the Property since the 2012 Phase I ESA Report. Review of the 2015 EDR Radius Map Report indicated no new information regarding releases or spills on or near the Property; however, the following information was obtained from the EDR report regarding the Property and should be updated for this Phase I ESA Update:

- The Property (AT&T Mobility cellular tower) is now listed in the NE AIRS (Nebraska Department of Environmental Quality {NDEQ}) and FINDS databases. The AT&T Mobility facility is listed in the NDEQ NE AIRS database due to the presence of the emergency generator on-site and the air emissions from the generator. The FINDS database is a record keeping database. It is Benesch's opinion that the AT&T Mobility facility still does not represent a REC for the Property.

The 2015 EDR Radius Map Report is included as an attachment to this report.

The EPA Enviromapper website <http://www.epa.gov/emefdata/em4ef.home> was accessed for information regarding the location of potential hazardous materials and petroleum products sites and surface spills on or near the Property. No facilities were identified on or near the Property.

ASTM E1527-13 Requirements

The new ASTM E1527-13 has been released since the 2012 ESA Report was prepared. The changes to the standard include the following items/requirements:

- That the potential for vapor migration be considered and identified as a REC if applicable. Based on review of the 2012 ESA Report, the 2015 EDR Radius Map Report, information from NDEQ and the Enviromapper website, the potential for vapor migration from adjacent or nearby sites is not considered a concern in connection with the Property. In addition, given the site conditions (e.g. no basement, slab on grade construction), any potential vapor migration would be unlikely to significantly impact the Property.
- Review of regulatory files for the target property or adjacent parcels if identified during the review of regulatory databases. The Property was not listed in the 2012 EDR Radius Map Report. However; the Property was listed in the 2015 EDR Radius Map Report under the FINDS and NE AIRS databases. As discussed previously, these listings were in relation to the AT&T Mobility cellular tower located on the Property. Based on review of NDEQ documents this listing is due to the presence of an emergency generator on-site and the potential air emissions from the generator and associated construction permit. This listing is not due to a release to the environment. The listing of the AT&T Mobility facility in the NE AIRS database does not represent a REC for the Property. The NDEQ file documents are included as an attachment to this report.
- The categorization of RECs to include historical RECs (HRECs) and controlled RECs (CRECs). The RECs listed in the 2012 ESA Report are not considered HRECs or CRECs, which both apply to sites

with past releases that have been addressed. There have been no release on the Property which have been addressed; therefore, an update to the RECs for the Property are not required for this Phase I ESA Update.

User Reliance

This report was prepared by Benesch at the request of and for the sole benefit and use of the “User”; Michael Henery and the Omaha Brownfields Coalition (lead coalition partner Metropolitan Area Planning Agency [MAPA]), subject to the limitations described in the report and in the contracting agreement between Benesch and the Omaha Brownfields Coalition.

Benesch acknowledges that this report will become a matter of public record and copies of this report will be available for review and reproduction through the MAPA website and/or the Freedom of Information Act (FOIA). Nevertheless, this report is intended for the exclusive use and reliance of the User in assessing environmental issues associated with the Property, and any use or reliance of this report by other parties is prohibited without the express written consent of the User and Benesch.

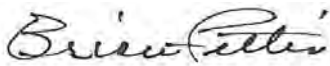

This report is complete only as an entire document and no section is intended to be used separately. Any unauthorized use a third party makes of this report, or any reliance on or decision made on the basis of it, is the responsibility of such third party. The User and Benesch are indemnified against any liability resulting from such third party use, reliance or decisions.

Conclusions

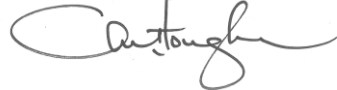

Based on review of the 2012 ESA Report, interviews, review of regulatory data, and a site visit, in addition to the requirements of ASTM E1527-13, Benesch has determined that updates to the report are necessary, which have been described in the appropriate sections of this Phase I ESA Update. However, the RECs identified in the 2012 ESA Report are still valid and do not need to be updated. In addition, no additional RECs were identified. As such, no further assessment of this site is recommended.

If you have any questions regarding the conclusions of this assessment, please do not hesitate to contact either of the undersigned at (402) 333-5792.

Respectfully Submitted,

Brian Fetting
Project Scientist

Chin Lim, P.E.
Project Manager

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/26/2015 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OMAHA LEAD	INTERSECTION I480 &	0 - 1/8 (0.000 mi.)	0	8

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OMAHA LEAD	INTERSECTION I480 &	0 - 1/8 (0.000 mi.)	0	8

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/10/2015 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

VOPAK USA INC	4120 BUCKINGHAM PLCE	SSW 1/2 - 1 (0.689 mi.)	J42	96

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 03/16/2015 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OMAHA LEAD	INTERSECTION I480 &	0 - 1/8 (0.000 mi.)	0	8

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 03/16/2015 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

NE SHWS: The Nebraska Department of Environmental Quality is providing this information from its own database. The data, although not verified to be the most current or accurate for any specific site, is generally based on the contents of the physical documents in the files. You may contact the Records Management Unit at (402) 471-3557 to make arrangements to view or to get a photocopy of the physical file.

A review of the NE SHWS list, as provided by EDR, and dated 06/16/2015 has revealed that there are 2 NE SHWS sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

OMAHA FMGP SITE	20TH AND CENTER STRE	NNE 1/2 - 1 (0.944 mi.)	K45	111

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 13 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 4 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Summary Details:

Conditions at Proposal February 26, 2002): The Omaha Lead site includes surface soils present at residential properties, child care facilities, schools, and other residential-type properties in the city of Omaha, Douglas County, Nebraska that have been contaminated as a result of air emissions from lead smelting operations. The total area of the Omaha Lead site is approximately 8,840 acres. The site is being proposed to the NPL because of the presence of lead contamination in soil at residential properties, child care facilities, schools, and other residential-type properties. The Asarco facility conducted lead refining operations from the early 1870s until 1996 . The Asarco facility is located on approximately 23 acres on the west bank of the Missouri River in downtown Omaha. During the operational period, lead and other heavy metals were emitted into the atmosphere through smoke stacks. The pollutants were transported downwind in various directions and deposited on the ground surface due to the combined process of turbulent diffusion and gravitational settling. In addition, Gould, Inc., operated as a lead battery recycling plant and was considered a secondary lead smelter in the area. The Gould, Inc., plant closed in 1982. Several other businesses in the Omaha area utilized lead in their manufacturing process. Subsequently in 1998, the Omaha City Council solicited assistance from the U.S. Environmental Protection Agency (EPA) in addressing problems with lead contamination in the Omaha area. The EPA initiated the process to investigate the lead contamination in the area under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act. An ongoing removal action included excavation of lead-contaminated soils from a number of properties. The criteria for removal included child care facilities and residences where blood lead concentrations in children were equal to or greater than 10 micrograms per deciliter (µg/dl) and where soil samples collected outside the roof drip line) contained lead concentrations equal to or greater than 400 milligrams per kilogram (mg/kg). Currently, removals have occurred at over 290 properties. No further remedial action at these 290 properties is anticipated based on information currently available. EPA prepared a Preliminary Assessment/Site Inspection Report in 2001. This report summarized numerous investigations that have been conducted at the Omaha Lead site. Results of these investigations indicate that lead contamination is present at elevated concentrations up to 2.5 miles from the former Asarco facility. Approximately 65,615 residents are located within the identified area of soil contamination. There are twenty Omaha Public Schools within this area including fifteen elementary schools, one middle school, two high schools, and two special study centers. The total enrollment at the twenty schools is 11,725 students. There are approximately 240 child care facilities within a 3-mile radius of the center of the site. The total number of children attending these facilities is unknown. Several parks and golf courses are present within the identified area of soil contamination. These parks are

accessible to the public and provide recreational opportunities to the public. In addition, approximately 135 acres of wetlands are located within the 4-mile radius of the site. Status April 2003): To date, removals have occurred at over 290 properties. These properties do not include the residents, schools, and daycare facilities described above. The description of the site release) is based on information available at the time the site was evaluated with the HRS. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices. For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at <http://www.atsdr.cdc.gov/toxfaq.html> or by telephone at 1-888-42-ATSDR or 1-888-422-8737.

Site Description: The Omaha Lead Site (OLS) includes contaminated surface soils present at residential properties, child-care facilities, and other residential-type properties in the city of Omaha, Nebraska, that have been contaminated as a result of historic air emissions from lead smelting/refining operations. The total area of the site is approximately 20 square miles and encompasses the eastern portion of the greater metropolitan area in Omaha, Nebraska. The site is centered around downtown Omaha, Nebraska, where two former lead processing facilities operated. American Smelting and Refining Company, Inc., (ASARCO) operated a lead refinery at 500 Douglas Street in Omaha, Nebraska, for over 120 years. The Gould, Inc. (Gould) lead battery recycling plant was located at 555 Farnam Street. Both facilities released lead-containing particulates to the atmosphere from their smokestacks. The ASARCO facility conducted lead refining operations at the 500 Douglas Street facility from the early 1870s until 1997. The ASARCO facility was located on approximately 23 acres on the west bank of the Missouri River in downtown Omaha. During the operational period, lead-contaminated particulates were emitted into the atmosphere through smokestacks and other processes. The pollutants were transported downwind in various directions and deposited on the ground surface. Aaron Ferer and Sons opened and operated a secondary lead smelter and lead battery recycling plant from the early 1950s until 1963. In 1963, the facility was purchased by Gould, who operated the facility until it closed in 1982. Land use at the site is residential, since the site is defined to include only residential and residential-type properties. The site is located entirely within the city limits of Omaha, Nebraska, where local zoning ordinances control land use. The continued residential use of property can be reasonably assumed for the

OMAHA LEAD (Continued)

1001814550

majority of the thousands of properties that comprise the site through local zoning control. It is likely that at some point in the future interest will arise in converting some of the current residential properties to non-residential use. Future non-residential use of remediated properties will remain protective of human health since the Remedial Action will provide for unrestricted future use. Also located within the general area of affected residential properties are numerous nonresidential properties, including the Omaha central business district. Non-residential properties are excluded from the site definition. Interest may arise in the future in converting some of the current non-residential property to residential use, particularly for multi-unit dwellings. Institutional controls for the impacted non-residential properties are prudent to assure that land use does not convert to residential without appropriate soil testing and soil response action, as required. Institutional controls to safeguard the conversion of non-residential properties to residential use will be addressed by a final remedial action for the site in a subsequent Record of Decision (ROD). Surface water and ground water are not affected by lead-contaminated soils at the impacted residential properties that comprise the site. Residential households located within the area of concern in Omaha receive their drinking water from the municipal water supply and are generally not served by individual ground water wells. Lead-contaminated surficial soils in residential areas are not believed to represent a significant threat to local ground water conditions. Ground water is not addressed by this ROD due to the limited number of potential receptors and the lack of impact on ground water quality. The most prominent surface water feature potentially affected by site contaminants is the Missouri River immediately east of the site. Public health is not threatened by potential site impacts on surface water quality in the Missouri River. There are no identified drinking water intakes within fifteen miles of the site. Sampling results of water and sediment in the Missouri River immediately adjacent to the ASARCO and Gould facilities did not detect elevated levels of lead contamination. Furthermore, the dilution provided by the tremendous flow of the Missouri River would reduce any potential release of transported site contaminants to non-detectable levels. Future use of surface water and ground water resources should not be affected by lead-contaminated soils at the site or the remedial action described in this ROD. The Douglas County Health Department (DCHD) performed monitoring of the ambient air quality around the ASARCO facility beginning in 1984. This air monitoring routinely measured ambient lead concentrations exceeding the 1.5 micrograms per cubic meter (ug/m³) ambient standard for lead. The highest recorded quarterly average measured in air was 6.57 ug/m³. The DCHD has compiled statistics on the results of blood lead screening of children less than seven years of age for more than 25 years. Blood lead screening of children living in zip codes located east of 45th Street have consistently exceeded the 10 microgram per deciliter (ug/dl) health-based threshold more frequently than children living elsewhere in the county. In 1998, the Omaha City Council requested assistance from the EPA to address the high frequency of children found with elevated blood lead levels by the DCHD. At that time, the EPA began investigating the lead contamination in the Omaha area under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The EPA began sampling residential properties and properties that were used to provide licensed child-care services in March 1999. The general boundaries of residential properties comprising the site were estimated at the time of listing on the EPA National Priorities List (NPL) by establishing a perimeter surrounding the properties that had been determined at the time to exceed 1,200 parts per million (ppm) lead. The area enclosed by this perimeter was approximately 8,840 acres (13.8 square miles), with an estimated population of 65,863 (based upon 1990 Census information). Using Census figures for Douglas County of 2.52

OMAHA LEAD (Continued)

1001814550

residents per home, this represented approximately 26,000 residences potentially impacted. Twenty public schools were also located within this area. Soil sampling of residential Omaha properties continued during the site Remedial Investigation (RI). Between March 1999 and January 2004, surface soil samples were collected from 15,012 residential properties. The site RI estimated that 16,000 residential properties may exceed 400 ppm lead, that 5,600 properties may exceed 800 ppm lead, and that 2,800 properties may exceed 1,200 ppm lead. On the basis of sampling data collected during the OLS RI, the focus area of the site was expanded to include an area of approximately twenty square miles (12,800 acres) bounded by Ames Avenue to the north, L Street to the south, 45th Street to the west, and the Missouri River to the east. These boundaries define a general area where the majority of the impacted properties are located. The actual site, however, includes any residential-type property that has become lead-contaminated as a result of historic industrial emissions. The site is defined on a property-to-property basis, and is not defined by a discrete boundary. According to 2000 Census data, the focus area includes 37,554 housing units, including single family and multi-family dwellings. The 2000 Census population for the focus area is 86,958, including 9,395 children less than seven years of age. The OLS Remedial Investigation reported that approximately 34 percent of all the residential properties tested exceeded 400 ppm lead. This percentage increases to approximately 40 percent exceeding 400 ppm if only properties in the focus area were considered. Soils tested in Council Bluffs, Iowa, and Carter Lake, Iowa, have not been found to consistently exceed this concentration. To date, the EPA has sampled approximately 24,000 residential properties in or near the area of interest at the site. Additional sampling is ongoing to complete the characterization of residential properties at the site. Due to the high concentrations of lead detected in yard soils, the EPA initiated a removal action to address lead-contaminated soils that exceed criteria for a time-critical removal action (TCRA) in 1999. This removal response is ongoing. The removal response involves the excavation and replacement of lead-contaminated soil where action levels identified in the Action Memorandum are exceeded. These response actions are currently conducted if: -A child seven years of age or younger (0 to 84 months) residing at the property is identified with an elevated blood level exceeding 10 ug/dl and any non-foundation sample collected from the property exceeds 400 ppm; -A property is a child-care facility, and any non-foundation sample collected from the property exceeds 400 ppm; or -Any non-foundation sample exceeds 1,200 ppm at any residential or residential-type property. During implementation of the Remedial Action, response actions will continue to be prioritized for these categories of residences. The EPA issued a general notice letter under CERCLA authority on August 4, 1999, to ASARCO, Incorporated (ASARCO) asking ASARCO to perform a time-critical removal action to address lead-contaminated soils at child care facilities and residences at the site. In a response dated August 13, 1999, ASARCO stated it was not interested in performing the removal action. On August 30, 1999, the EPA issued a Unilateral Administrative Order (UAO) (Docket Number-CERCLA-7-99-0029), ordering ASARCO to perform the necessary removal action. ASARCO responded on September 7, 1999, stating they would not comply with the UAO. The EPA proceeded with a fund-lead removal action to address the threat associated with the lead contamination in the residential soils, which is ongoing. The EPA subsequently identified three additional potentially responsible parties (PRPs): Union Pacific Railroad Company, Gould Electronics, Inc., and Aaron Ferer & Sons Corporation. The EPA has coordinated with these four PRPs during the implementation of response actions at the site. General notice letters were issued on June 4, 2002, to initiate discussions on the performance of the Remedial Investigation/Feasibility Study (RI/FS). The four parties were not interested in performing the RI/FS so EPA proceeded using

MAP FINDINGS

OMAHA LEAD (Continued)

1001814550

fund monies. Special notice letters have not been issued to any of the identified PRPs to date. The site was proposed for the NPL on February 26, 2002. The NPL listing became final for the site on April 30, 2003. The EPA is the lead agency for this project. The Nebraska Department of Environmental Quality (NDEQ) serves as the support agency to EPA. An Interim Record of Decision (ROD) addressing Operable Unit 1 (OU1) of the Omaha Lead Site was completed in December 2004. The Interim ROD expanded the scope of the ongoing response action to include excavation and replacement of residential soils exceeding 400 ppm at typical residential and residential-type properties where the maximum non-foundation soil lead level exceeded 800 ppm, and continued removal and replacement of soils exceeding 400 ppm at child care centers and residences where children with elevated blood lead levels resided. The selected interim remedy added new elements to the response action, including stabilization of deteriorating exterior lead-based paint in cases where the continued effectiveness of the soil response was threatened, high-efficiency interior dust cleaning at eligible properties, health education, and participation in a comprehensive remedy with other agencies and organizations to address all identified lead exposure sources in the community. In March 2005, the scope of the ongoing removal action was amended to include all elements of the Interim ROD, which continued until work commenced under CERCLA remedial authority. Removal response was discontinued when remedial response commenced. Proceeding under CERCLA remedial authority, EPA completed soil excavation and replacement (remediation) at 255 properties in 2005 for a total of 1,060 properties completed under combined removal and remedial authority. During 2006, soil remediation was completed at 1,044 properties under remedial authority. Soil remediation was completed at an additional 1,000 properties in 2007 and 800 properties in 2008. Through the close of the 2008 construction season, soil excavation and replacement under CERCLA removal and remedial authority has been completed at 4,615 residential properties. Stabilization of deteriorating exterior lead-based paint in accordance with the interim remedy commenced in 2007 through a cooperative agreement with the city of Omaha's Lead Hazard Control Program. Stabilization was completed at 18 properties in 2007. In 2008, under both EPA and the city of Omaha contracts, stabilization of deteriorating exterior lead-based paint was completed at 1,169 properties. During implementation of the interim remedy, EPA continued to perform soil lead characterization to support a final remedy for the OLS. In October 2008, EPA released a draft Final Remedial Investigation, which presented results of all site investigations including soil sampling performed at more than 35,000 residential properties. Based on the 2008 data set, EPA established the Final Focus Area for the Site, which defined the area of residential properties that are targeted for sampling. This area is generally bounded by Read Street to the north, 56th Street to the west, Harrison Street (Sarpy County line) to the south, and the Missouri River to the east, and encompasses 17,290 acres (27.0 square miles). The 2000 U.S. Census data for this area shows a total population of 125,650, including 14,117 children seven years of age and younger. Information from the Douglas County Assessor's Office indicates the presence of 39,783 residential properties within the Final Focus Area. Through completion of the OLS Final Remedial Investigation, soil sampling had been completed at 37,076 residential properties, including 34,565 within the Final Focus Area's boundary. Of the residential properties sampled, the 800 ppm soil action level established by the Interim ROD was exceeded at 4,144 properties. An additional 8,552 properties had soil lead levels between 400 ppm and 800 ppm. In total, 34.2 percent of properties sampled through completion of the 2008 RI had at least one mid-yard sample with a soil lead level exceeding 400 ppm. Based on the data trends, the OLS Final FS estimates that soil lead levels will exceed 400 ppm at a total of 14,577 properties when soil sampling is completed at all properties

1001814550

within the Final Focus Area. On the basis of spatial analysis of the data generated during the Final OLS RI, EPA established a Final Focus Area for the OLS. Portions of the Final Focus Area extend for 56th Street to the west, the Missouri River to the east (excluding the Omaha central business district), Read Street to the north, and Harrison Street to the south. The Final Focus Area boundaries define a general area where the majority of the properties impacted by former lead processing emissions are located and soil sampling has been prioritized. The actual site, however, includes any property where soil lead levels exceed EPA criteria for initiating remedial action. The Site is composed of individual properties that exceed the established action levels, defined on a property-to-property basis, and is not defined by a discrete boundary. Following completion of the Interim ROD, special notice letters were issued to the four PRPs on December 16, 2004, requesting payment of past costs and performance of the work under the Interim ROD. A good faith offer for performance of the work was not received. On March 31, 2005, an Administrative Order (Docket No. CERCLA-07-2005-0207) was issued with a delayed effective date to Union Pacific requesting performance of the work required by the Interim ROD. The effective date was extended several times to allow continued discussions with Union Pacific. The Administrative Order became effective on December 16, 2005. Union Pacific responded on January 3, 2006, indicating that it would not comply with all of the provisions of the Administrative Order. EPA proceeded with a fund-lead remedial action to address the threats posed by Site contamination. In August 2005, ASARCO filed for bankruptcy protection under Chapter 11 of the Bankruptcy Code in the Southern District of Texas, Corpus Christi Division. The United States filed a proof of claim in the bankruptcy action to cover all past and future costs associated with the OLS. Numerous other sites and facilities are included in the bankruptcy case. An estimation hearing on the claim for the OLS was held in Corpus Christi, Texas in August 2007. The claim for the Omaha Lead Site has not been determined and the bankruptcy reorganization case is still ongoing. On the basis of studies and other supporting documents in the OLS administrative record, EPA released for public comment a final Proposed Plan for Operable Unit 2 on October 30, 2008. The Proposed Plan proposed lowering the soil lead action level to 400 ppm for all residential-type properties impacted by the former lead processing facilities. On the basis of information in the Final RI, a total of 14,581 properties at the OLS were estimated to be eligible for response. Through the end of the 2008 construction season, soil cleanup had been completed at 4,615 properties at the OLS, leaving an estimated 9,966 properties which would be eligible for soil remediation under Operable Unit 2. Operable Unit 2 includes all remaining remedial response work at the OLS. Work remaining under Operable Unit 1 that has not yet been completed will be accomplished under Operable Unit 2. Properties identified with time-critical conditions, including residences with elevated blood-lead levels in children and high child-impact areas, will continue to receive prioritized response during the final remedy implemented under Operable Unit 2. The precise scope of work remaining to be completed under Operable Unit 2 is not known with certainty since sampling has not been completed to determine eligibility for soil remediation, exterior lead based paint stabilization, and interior dust response. The projections of work remaining presented in the Final Remedial Investigation (RI) and Final Feasibility Study (FS) are based upon trends in data collected through the completion of the 2008 construction season. A ROD addressing Operable Unit 2 was completed in May 2009.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- . Waste name: CORROSIVE WASTE
- . Waste code: F002
- . Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- . Waste code: F003
- . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- . Waste code: F005
- . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 16118

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 31071

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 50

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 15

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 10067

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 10067

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 10067

Waste code: U057

Waste name: CYCLOHEXANONE (I)

Amount (Lbs): 4675

Corrective Action Summary:

Event date: 01/28/1992

Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 11/02/1992

Event: RFA Completed, Assessment was an RFA.

Event date: 11/02/1992

Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 04/28/1993

Event: RFI Imposition

Event date: 09/16/1993

Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 10/26/1994

Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 01/25/1996

Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.

Event date: 01/25/1996

Event: Current Human Exposures under Control, More information is needed to make a determination.

Event date:	03/28/1997
Event:	RFI Workplan Approved
Event date:	10/01/1997
Event:	CA001
Event date:	06/01/1998
Event:	Current Human Exposures under Control, Effective 2/5/1999 per revised program guidance: This code for 'No control measures necessary' should no longer be used. Previously entered NC status codes should be updated, but may remain in the database until they are replaced by more recent codes.
Event date:	06/01/1998
Event:	Certification Of Remedy Completion Or Construction Completion
Event date:	06/01/1998
Event:	Corrective Action Process Terminated, No Further Action
Event date:	06/01/1998
Event:	RFI Approved
Event date:	06/01/1998
Event:	Date For Remedy Selection (CM Imposed)
Event date:	06/01/1998
Event:	Igration of Contaminated Groundwater under Control, Effective 2/5/1999 per revised program guidance: This code for 'No release to groundwater' should no longer be used. Previously entered NR status codes should be updated, but may remain in the database until they are replaced by more recent codes.
Event date:	12/09/1999
Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event date:	12/09/1999
Event:	Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event: Migration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 02/16/2001
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 07/09/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 10/19/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/07/2015
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 07/10/2015

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/10/2015
Date Data Arrived at EDR: 03/31/2015

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/17/2015	Telephone: 703-603-0695
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 06/01/2015
Number of Days to Update: 77	Next Scheduled EDR Contact: 09/14/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2015	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

SHWS: Superfund State Program List

The Nebraska Department of Environmental Quality is providing this information from its own database. The data, although not verified to be the most current or accurate for any specific site, is generally based on the contents of the physical documents in the files. You may contact the Records Management Unit at (402) 471-3557 to make arrangements to view or to get a photocopy of the physical file.

Date of Government Version: 06/16/2015	Source: Dept. of Environmental Quality
Date Data Arrived at EDR: 06/23/2015	Telephone: 402-471-3557
Date Made Active in Reports: 07/13/2015	Last EDR Contact: 06/18/2015
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/05/2015
	Data Release Frequency: Varies

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Licensed Landfill List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 06/22/2015	Source: Department of Environmental Quality
Date Data Arrived at EDR: 06/25/2015	Telephone: 402-471-4210
Date Made Active in Reports: 07/13/2015	Last EDR Contact: 06/18/2015

State and tribal institutional control / engineering control registries

INST CONTROL: Nebraska's Institutional Control Registry

A list of sites within Nebraska that have institutional controls. According to the Environmental Protection Agency (EPA), institutional controls are "non-engineering measures designed to prevent or limit exposure to hazardous substances left in place at a site, or assure effectiveness of the chosen remedy. Institutional controls are usually, but not always, legal controls, such as easements, restrictive covenants, and zoning ordinances." In short, institutional controls are a type of environmental covenant typically used when property is to be cleaned up to a level determined by the potential environmental risks posed by a planned use, rather than to unrestricted use standards. This method of control has proven to be both environmentally and economically beneficial.

State and tribal Brownfields sites

BROWNFIELDS: Potential Brownfields Inventory Listing

"NDEQ defines a brownfields site as subpart (A) of CERCLA ? 101(39): 'Real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.' This is a broad-based approach to capture all potential brownfields sites. In the event that CERCLA 128(a) State Response Program funds are utilized - for example, conducting a Section 128(a) Assessment - the exclusions, site-by-site determinations, and further definitions as provided by the law would need to be met. This would be done on a site-by-site basis." A preliminary Survey and Inventory of Brownfields Sites in Nebraska was constructed based on previously submitted information including sites named specifically by city representatives. The list was built on facility characteristics, which were founded on previous, broad-based contamination experience. Additions to the inventory were made by looking for other sources of potential brownfields sites using Standard Industrial Classification (SIC) codes. A general sector list was constructed to serve as an inventory guide. This list shows all of the different types of sites that are within the inventory (sorted by SIC code), and the number of sites there are of each type. Color-coated blocks, which group together similar SIC codes and the sites that they encompass also sort the sectors.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

RECEIVED

AUG - 1 2014

Subject: 2625 Deer Park, Omaha, NE 68108

 Nebraska Dept of Environmental Quality
 By: _____ DEQ# 195 _____

Dear Mr. Graiver:

On behalf of New Singular Wireless PCS, LLC dba AT&T Mobility (AT&T), EnviroBusiness Inc., d.b.a. EBI Consulting (EBI) respectfully submits this letter to document that the proposed AT&T emergency generator installation to be located at 2625 Deer Park, Omaha, NE 68108 is below Potential to Emit (PTE) thresholds for an Air Quality Construction Permit (CP). The proposed emergency generator is a diesel-fired, US EPA certified engine of less than 86 bhp, 50-60 kW. We have attached a copy of the Nebraska DEQ spreadsheet, which demonstrates that all emissions are below the CP thresholds. See Table 1 below from that spreadsheet.

TABLE 1 - Diesel Engine-driven Generators, ≤ 600 hp						
Fuel: <u>Diesel</u>		Engine Output:				
Sulfur Content (%) =		Electrical Output ^[1] :	85 hp			
Heat Content (Btu/gal) =	137,000	Max. Fuel Input ^[2] :	57 kilowatt			
			4.3 gal/hr			
Pollutant	Emission Factor	E.F. Unit	Emission Factor Source ^[3]	Emission Rate (lb/hr)	Emissions (ton/yr)	
PM	2.20E-03	lb/hp-hr	Table 3.3-1	0.19	0.82	
PM ₁₀	2.20E-03	lb/hp-hr	Table 3.3-1	0.19	0.82	
SO _x	2.05E-03	lb/hp-hr	Table 3.3-1	0.17	0.76	
NO _x	0.031	lb/hp-hr	Table 3.3-1	2.64	11.54	
CO	6.68E-03	lb/hp-hr	Table 3.3-1	0.57	2.49	
VOC ^[4]	2.47E-03	lb/hp-hr	Table 3.3-1	0.21	0.92

RE: (10) Applications for Air Quality Construction Permits in the State of Nebraska

Dear Mr. David Graiver, P.E.,

On behalf of New Cingular Wireless PCS, LLC dba AT&T Mobility (referred to herein as "AT&T"), AT&T Services, Inc. is requesting authorization to operate one (1) 50 kW emergency standby generator at the following ten (10) AT&T facilities in Sarpy, Douglas, Lancaster and Cass Counties:

- 1502 John F. Kennedy Drive, Bellevue – Sarpy County
- 211 West 22nd Street, Bellevue – Sarpy County
- 6777 C Street, Omaha – Douglas County
- 6015 Country Club Drive, Omaha – Douglas County
- 4625 Farnum Street, Omaha – Douglas County
- 2625 Deer Park, Omaha – Douglas County
- 11027 I Street, Omaha – Douglas County
- 601 Fletcher Avenue, Lincoln – Lancaster County
- 4101 West O Street, Lincoln – Lancaster County
- 29261 West park Highway B, Ashland – Cass County

By submitting this form, AT&T agrees to operate and maintain the emergency generator in accordance with all applicable provisions.

Enclosed you will find the following items:

- Letter/Applications for Air Quality Construction Permits
- Fuel/Emissions Data Worksheets

Please direct permits, and any questions or concerns related to this application, to me at:
AT&T Services, Inc., 2600 Camino Ramon-Room 3000A, San Ramon, CA 94583
(925) 327-2532 bw2989@att.com.

Sincerely,
AT&T Services, Inc.

Barbara Walden
Manager, Environment, Health & Safety

Subject: Construction Notifications for Lancaster County, Nebraska

Ms. Walden,

Thank you for your notifications regarding the new engine installations at the AT&T facilities in Nebraska. However, several of these locations are in areas outside of the NDEQ's air jurisdiction. Air Quality Permitting in Lancaster County is handled by the Lancaster County Health Department (<http://lincoln.ne.gov/city/health/enviro/pollu/air.htm>) and Air Quality Permitting in the city of Omaha is handled by the City of Omaha Public Works (<http://cityofomaha.org/pwredo/air-quality-control>).

Notices for the following locations should be directed to Mr. Chris Schroeder of the Lancaster County Health Department:

601 Fletcher Avenue, Lincoln – Lancaster County
4101 West O Street, Lincoln – Lancaster County

Notices for the following locations should be directed to Mr. Tim Burns of the City of Omaha Public Works:

6777 C Street, Omaha – Douglas County
6015 Country Club Rd, Omaha – Douglas County
4624 Farnam St, Omaha – Douglas County
2625 Deer Park, Omaha – Douglas County
11027 I St, Omaha – Douglas County

Again, the NDEQ appreciates your advance notification on this issue. Please let me know if you have any further questions.

David Graiver, P.E.
Air Construction Permitting Unit Supervisor
Nebraska Department of Environmental Quality
