7.6 REGIONALLY SIGNIFICANT TRANSPORTATION INVESTMENTS

The list of street and highway projects eligible for Federal aid funding following in this section is fiscally-constrained to reasonably available local, state, and federal revenues. Project costs take inflation into account and appear in year-of-expenditure dollars. Therefore, project costs for future years appear higher than what they would cost if constructed today. As is described in Section 7.3, federal funding levels were identified based on past trends within the Omaha-Council Bluffs region. Local revenues were identified based on local financial reports and identified operations & maintenance costs.

These projects listed in this LRTP are considered eligible for Federal-Aid funding by the MPO. Projects will be selected for Federal aid funding as they go through the MPO’s project selection and prioritization process for the TIP, while some projects may be advanced using solely local funding sources. The following sections divide the projects between Regionally Significant Roadway & Trail Projects, Regionally Significant Transit Investments, and Illustrative Projects.

7.5.1– REGIONALLY SIGNIFICANT ROADWAY & TRAIL INVESTMENTS

The tables that follow this section include regionally significant roadway and trail projects identified from the 2035 Long Range Transportation Plan and the scenario planning process described earlier in this chapter. These investments represent the federal-aid eligible portion of this LRTP as the total funding for both local and state projects has been

The FY2016-2019 Transportation Improvement Program serves as the four-year implementation program of this plan. Projects identified in this TIP are included in the first band of projects within this project list.

A summary of the fiscally constrained Roadway & Trail program is included in Table 7.8 below.

7.7 FISCAL CONSTRAINT OVERVIEW FOR ROADWAY & TRAIL PROJECTS

In order to demonstrate fiscal constraint of the projects and revenues identified in this chapter, MAPA has included Tables 7.13 (below) and 7.14 (next page). These tables correlate the anticipated federal-aid highway revenues, local revenues, and estimated project costs to summarize the analysis conducted within this chapter. The positive balances shown in Table 7.13 below demonstrates that the identified Federal-Aid program of projects is fiscally constrained. Balances in the short-term bucket reflects the inability to program funding by year for non-regional sources of federal funding.

Table 7.14 (next page) summarizes non-federal-aid revenue and expenditures identified within this plan. The maps that follow this section show identified Federal-Aid investments, non-federal-aid projects, and all projects together.
