

Save the Date! Join us for a Redevelopment Workshop August 20!

The Nebraska Department of Environment and Energy (NDEE), Metropolitan Area Planning Agency (MAPA), One Omaha, National Park Service, Omaha Public Power District in partnership with the Technical Assistance to Brownfields (TAB) Program at Kansas State University and U.S. EPA Region 7 INVITE YOU to attend a **free** brownfields resources workshop.

Reuse and redevelopment of abandoned, idled, or underutilized real property (a.k.a. brownfields) are both a challenge and an opportunity. Putting these sites back into productive use can serve as a catalyst for local economic revitalization.

The workshop is designed to assist communities in identifying state and federal resources available to resolve environmental issues often associated with brownfields properties and demonstrate how to take actionable steps towards project completion. Attendees will also hear from city, regional council of governments, and nonprofit representatives with experience on economic and community revitalization, including tips, available resources, and lessons learned. Come take advantage of this free educational and networking opportunity.
