INTRODUCTION AND METHODOLOGY

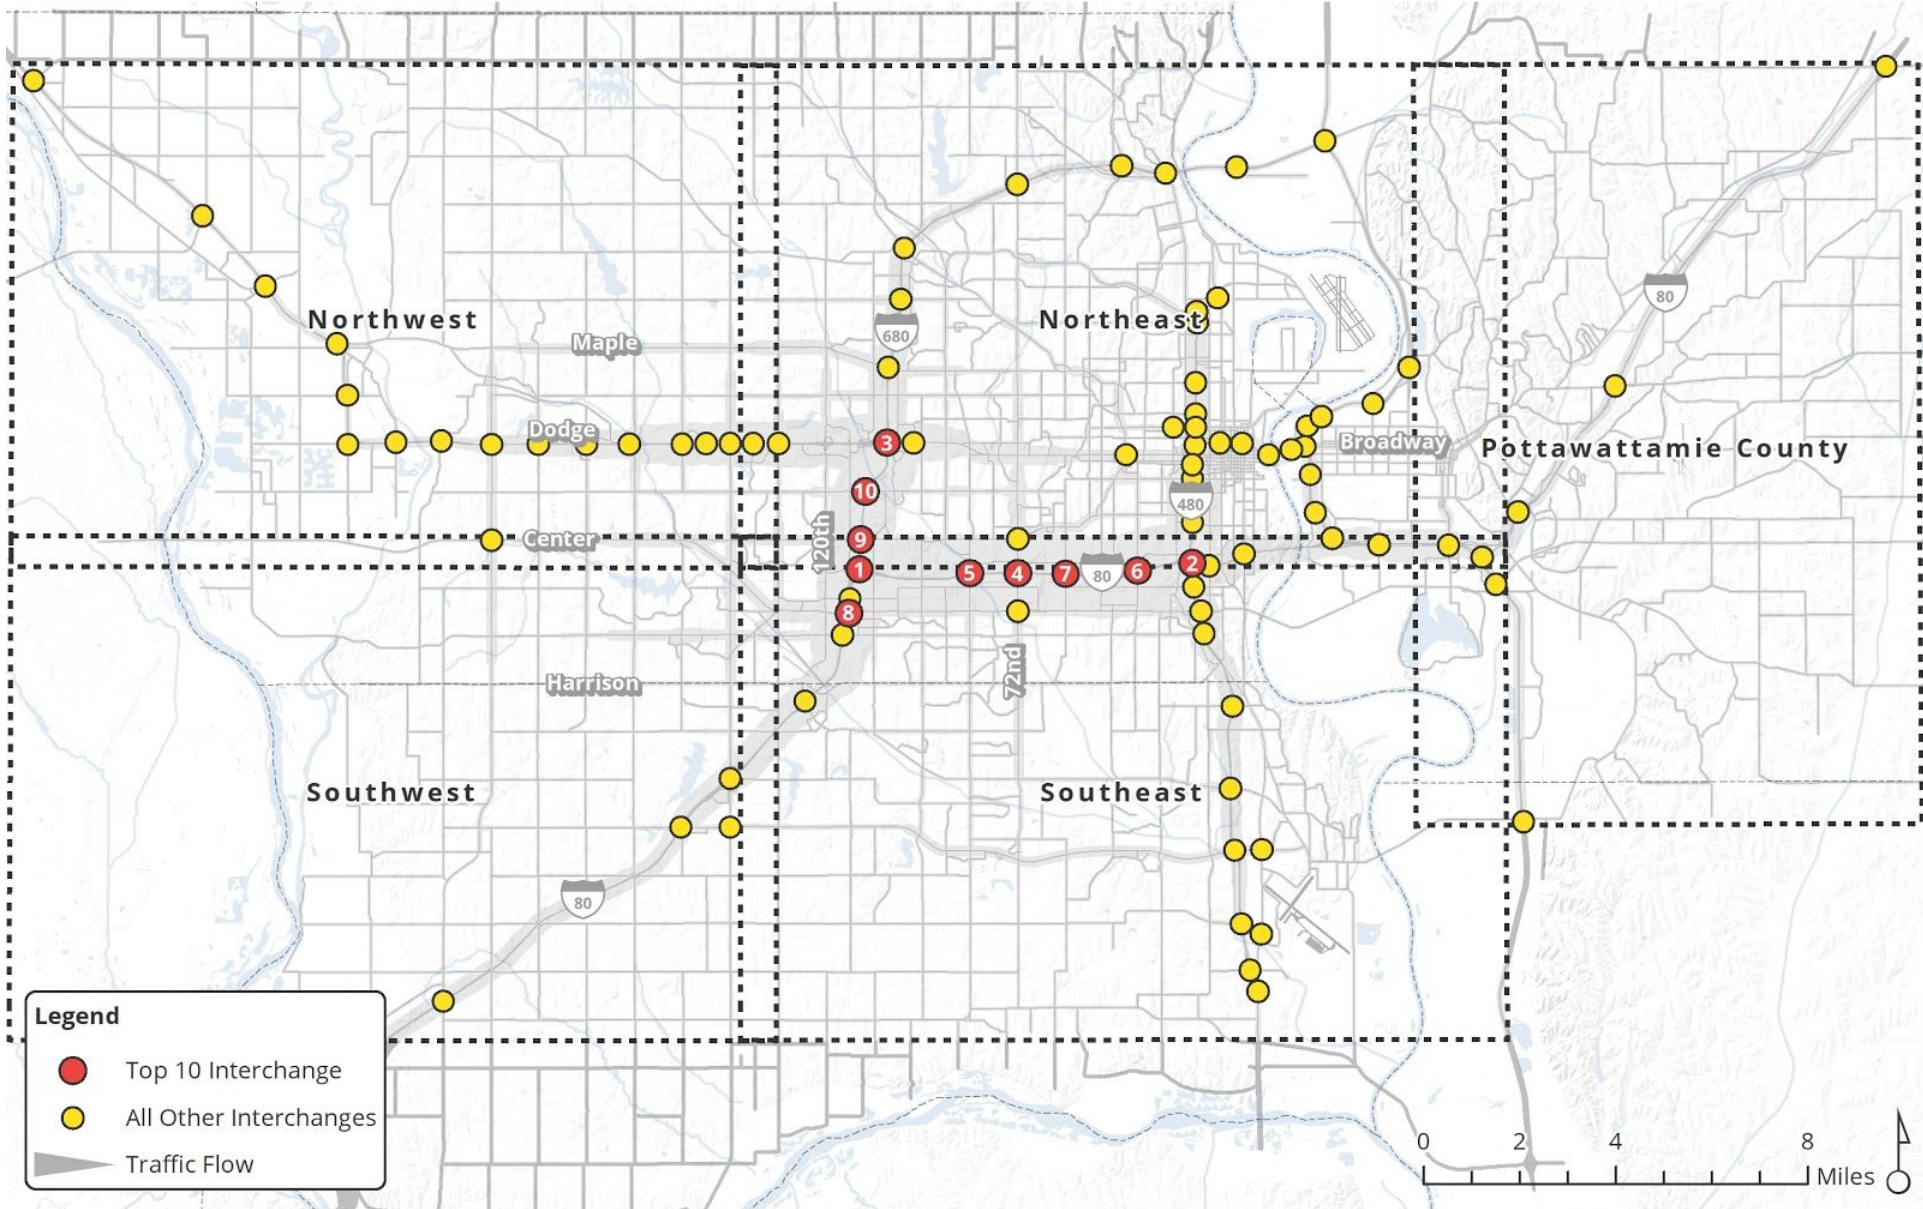

The Top Traffic Interchanges report is a biennial publication produced by the Metropolitan Area Planning Agency (MAPA) as part of its ongoing transportation planning process. The report is produced in conjunction with the *Traffic Flow Map*, the *Traffic Growth Report* and the *Top Traffic Intersections Report*. The top traffic interchanges listed in this publication are based on data compiled by MAPA in cooperation with local, state and federal agencies.¹ This data represents actual or derived Annual Average Daily Traffic (AADT) for the Omaha-Council Bluffs metropolitan area. From 2018 onward all traffic volumes are reported in Annual Average Daily Traffic (AADT). Users of the MAPA biennial traffic data should note previous reports were presented as Annual Average Weekly Traffic (AAWT).

This report is for *interchanges* only and, therefore, does not include information for *intersections*. Locations such as 72nd and “L” Street, Saddle Creek Road and Dodge Street, and 72nd Street and West Center Road that do not have an at-grade crossing are considered interchanges and are included in this report. For information regarding intersections please consult the MAPA Top Intersections report.

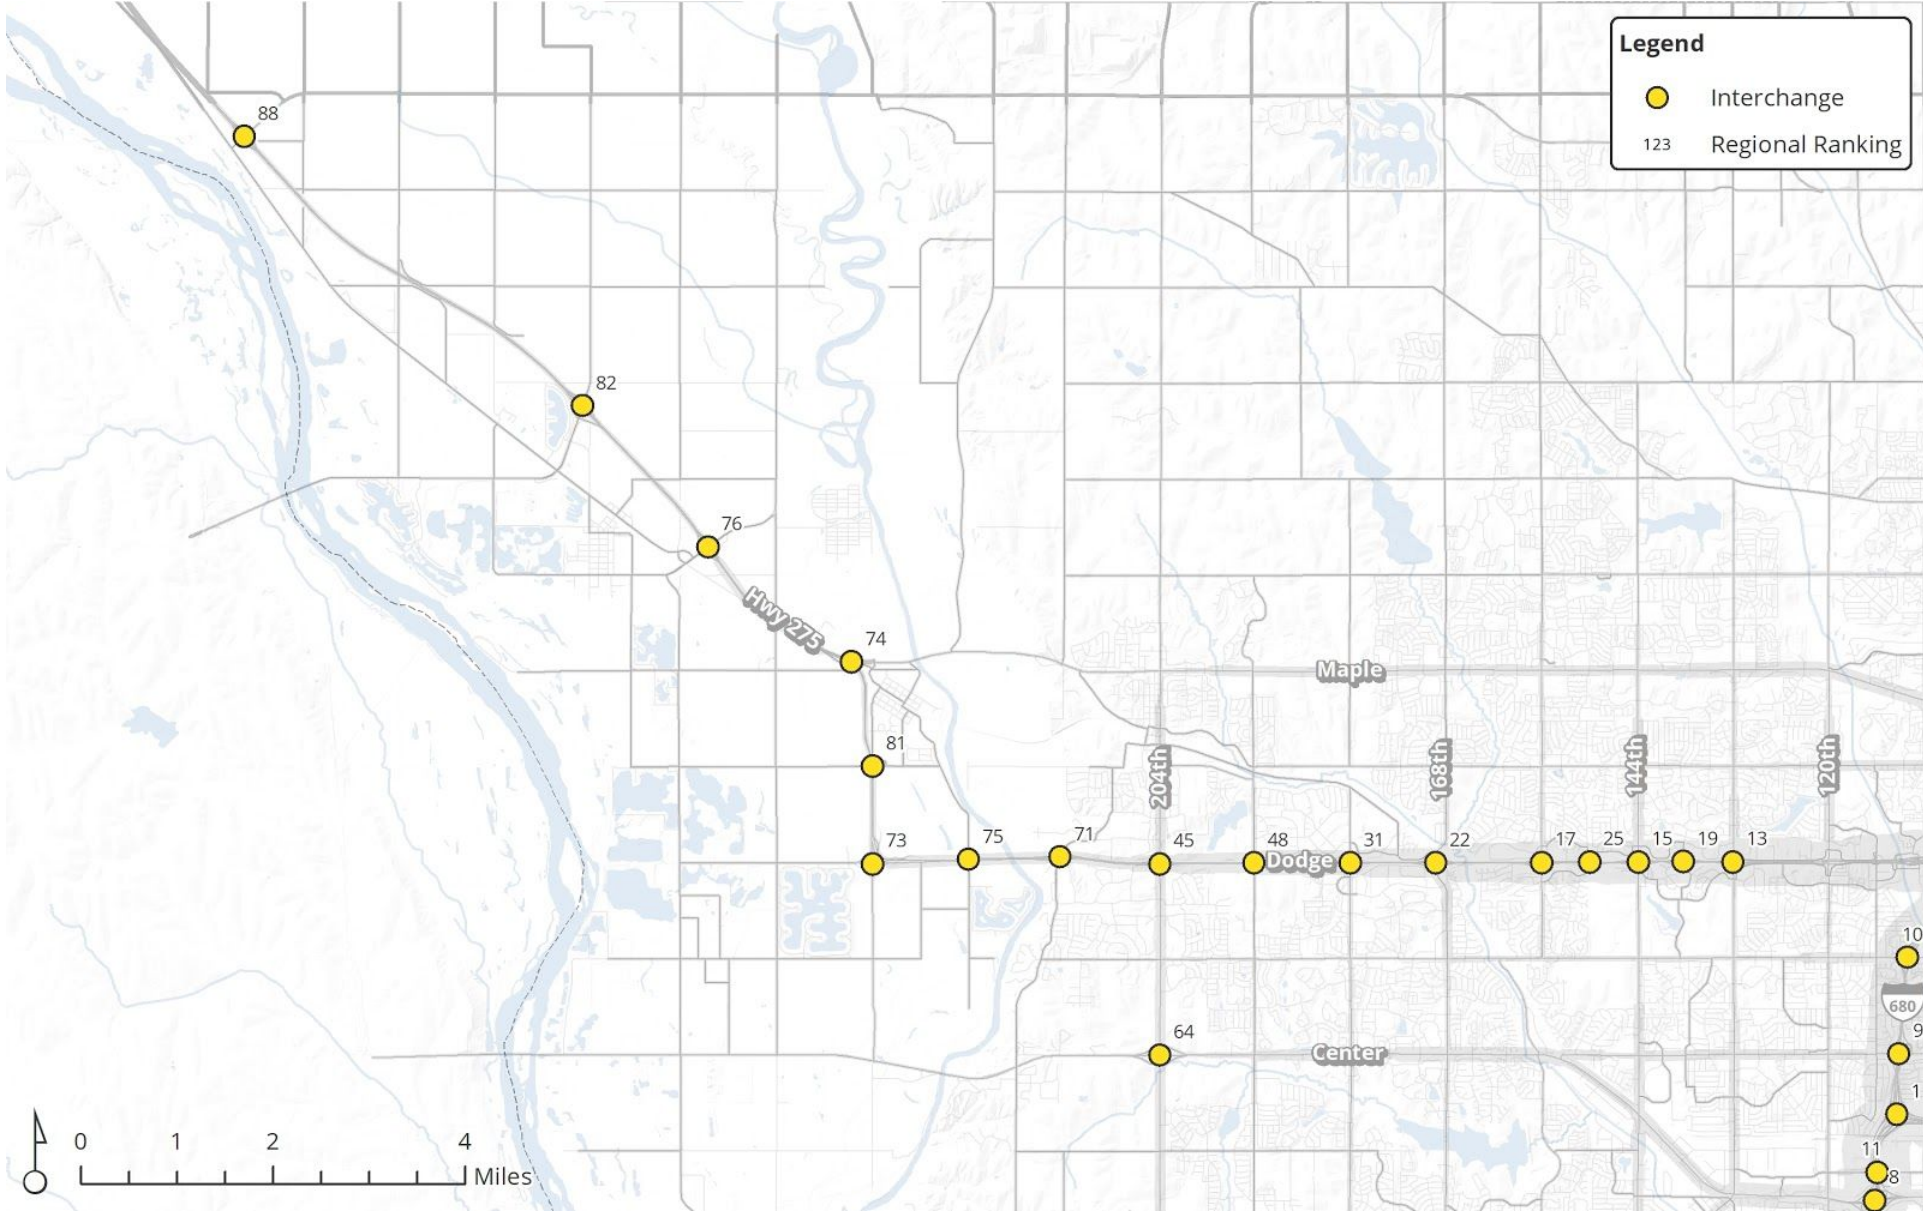

INTERCHANGE MAPS AND TABLES

The report begins with maps graphically representing the interchange rankings from a sub-regional perspective. Following the maps is a ranked listing of the metropolitan area’s ninety-one interchanges in 2018. These interchanges have been ranked based on total vehicle volumes, which are calculated by totaling the traffic counts from each leg of the interchange and dividing by two. The rankings list the counts for each leg of the interchange and the interchange total in descending order for the region.

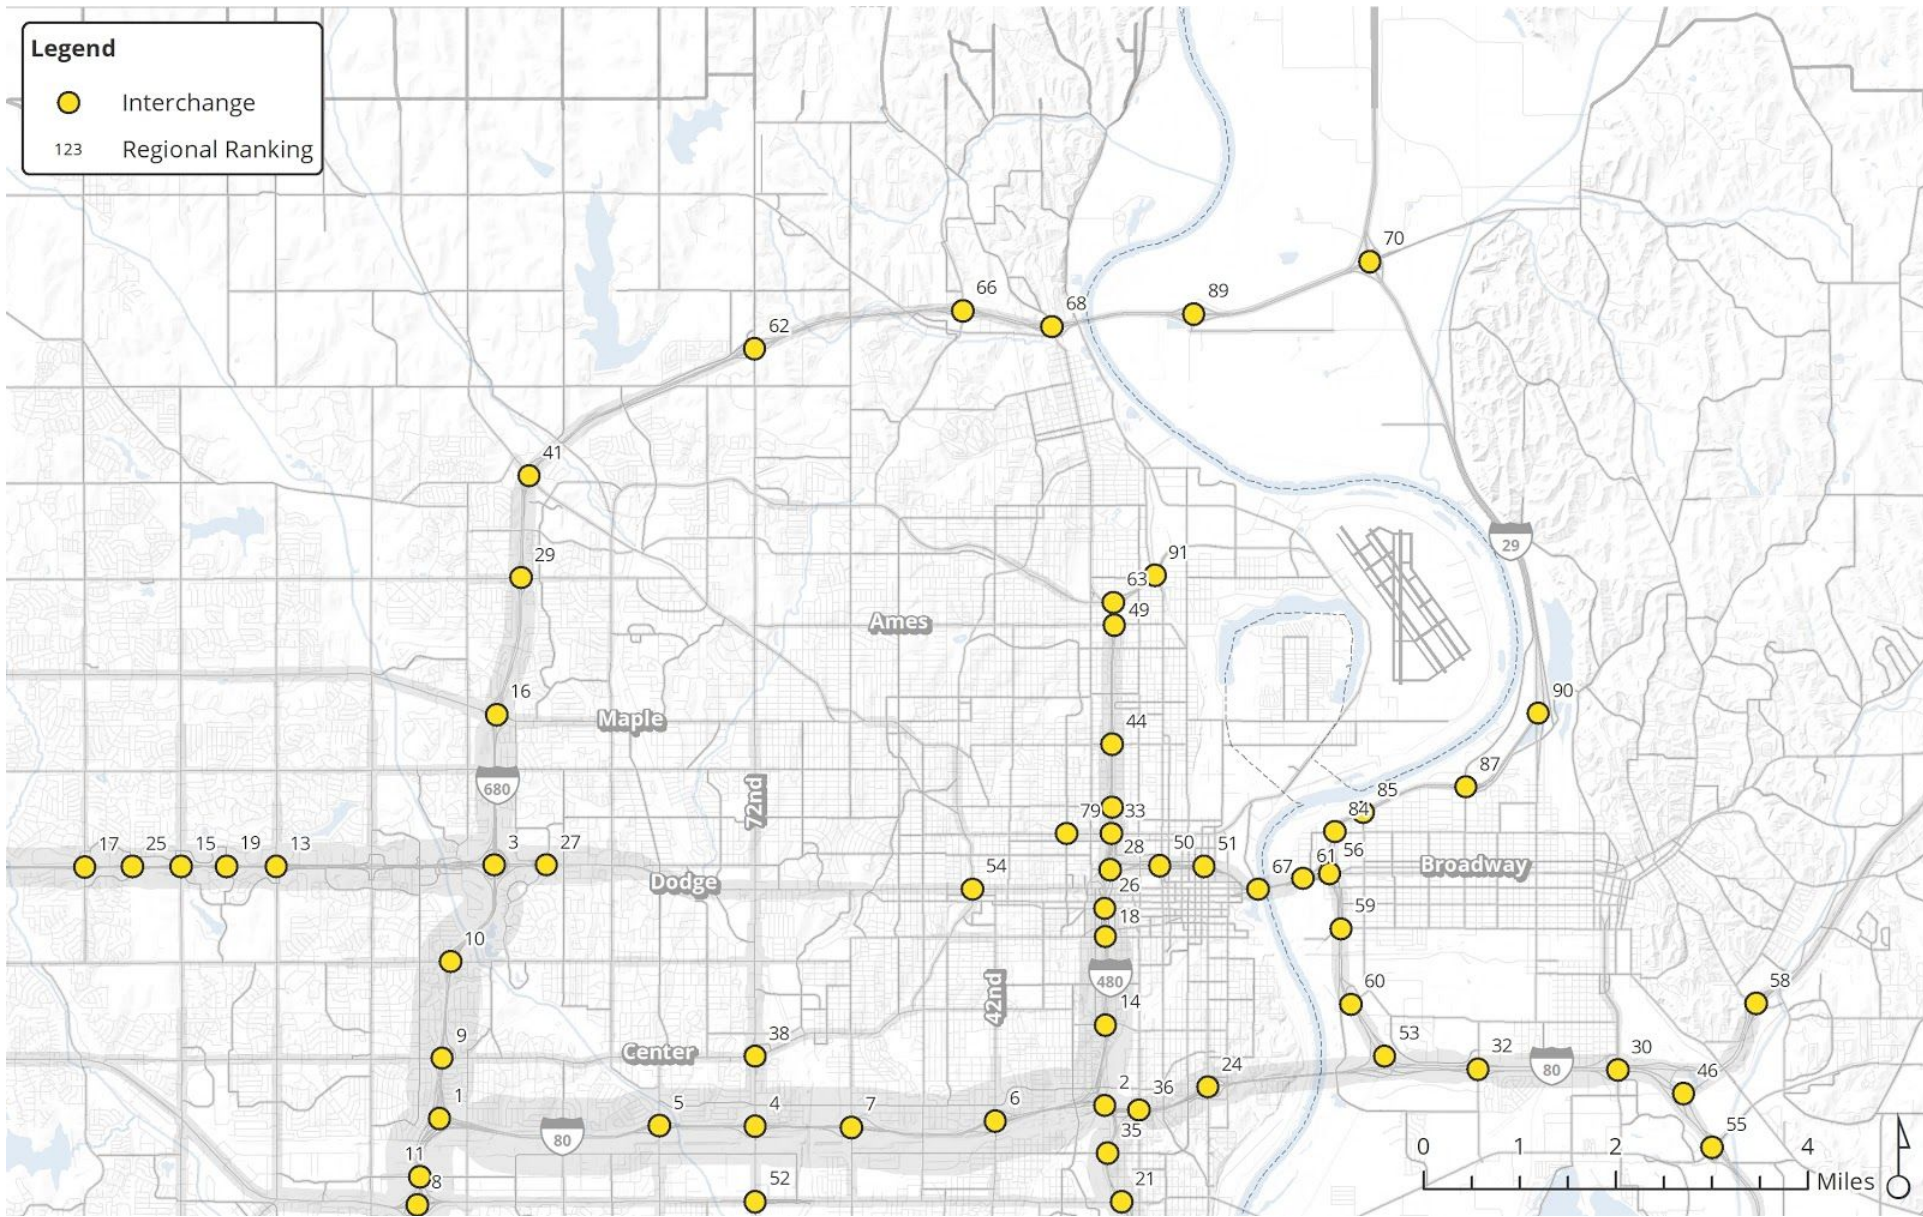

¹ Cities of Bellevue, Council Bluffs, La Vista, Omaha, Papillion; Counties of Douglas, Pottawattamie, Sarpy; Iowa DOT, and NDOT.
