Alphabetical List of Intersections in the MAPA Region 27

INTRODUCTION AND METHODOLOGY

The Top Traffic Intersections report is a biennial publication produced by the Metropolitan Area Planning Agency (MAPA) as part of its ongoing transportation planning process. The report is produced in conjunction with the *Traffic Flow Map*, the *Traffic Growth Report* and the *Top Traffic Interchanges Report*. The top traffic intersections listed in this publication are based on data compiled by MAPA in cooperation with local, state and federal agencies.¹ This data represents actual or derived Annual Average Daily Traffic (AADT) for the Omaha-Council Bluffs metropolitan area. From 2018 onward all traffic volumes are reported in Annual Average Daily Traffic (AADT). Users of the MAPA biennial traffic data should note previous reports were presented as Annual Average Weekly Traffic (AAWT).

This report is for *intersections* only and, therefore, does not include information for *interchanges*. To qualify as an intersection there must be an at-grade, or same level crossing. Locations such as 72nd and “L” Street, Saddle Creek Road and Dodge Street, and 72nd Street and West Center Road that do not have an at-grade crossing are considered interchanges and are excluded from this report. Similarly, if one of the crossings contains a median, such as W. Dodge Road 96th St., it is not considered an intersection. For information regarding interchanges please consult the MAPA Top Interchanges report.

In past years, separate sub-reports were created for Bellevue, Council Bluffs, and Sarpy County. This report aggregates and ranks intersections within each county (Douglas, Sarpy, and Pottawattamie) and provides a regional ranking as well.

The intersections in the report have been ranked based on total intersection volumes. The rankings present the AADT for each intersection leg as well as the intersection total. Intersection totals are calculated by totaling the traffic counts from each leg of the intersection and dividing by two, which captures the total number of vehicles passing through an intersection.

The intersection of 90th Street and West Dodge Road remains the busiest intersection in the region. The Dodge and L Street Corridors once again show the highest volumes in the metro area, with 7 of the top 10 intersections are located along Dodge or L St. /Industrial Rd. Moreover, the intersections along Industrial Road from 120th to 144th showed over 25% growth during the report period.

INTERSECTION MAPS

The maps which follow graphically represent the intersection rankings. While most rankings appear on these maps, some may not be shown due to overlapping of numbers or being outside the mapped areas. However, the maps in this section denote the locations of the Top 500 intersections in the region which corresponds to the regional tables following the maps in this report. An alphabetical index of all intersections follows the rankings at the end of the report.

¹ Cities of Bellevue, Council Bluffs, La Vista, Omaha, Papillion; Counties of Douglas, Pottawattamie, Sarpy; Iowa DOT, and NDOT.
