Project Additions & Removals

MAPA utilizes the flexibility provided under 23 CFR § 450.326(h) to group projects “by function, work type, and/or geographic area” in the TIP based on the scale, anticipated environmental impacts, and/or regional significance of anticipated activities. Projects in these groups are constrained within the TIP based on available funding in a program year, but are not listed as regionally significant investments in MAPA's Long Range Transportation Plan (LRTP) due to their scale and scope. These groups were not properly shown in the 2050 LRTP and have been added as project entries. Projects in these groups have been removed from the Short-Term Federal-Aid Project List in Chapter 6 of the 2050 LRTP, but their combined cost is contained within the new group records.

Revenue Updates

Updated revenue tables are in progress and will be presented at TTAC.
