

TRANSPORTATION IMPROVEMENT PROGRAM

2027 - 2032

Draft - May 2026

MAPA

DRAFT

This Page Intentionally Left Blank

OMAHA-COUNCIL BLUFFS METROPOLITAN AREA PLANNING AGENCY

RESOLUTION NUMBER 2026 – xx

WHEREAS, the members of the Omaha-Council Bluffs Metropolitan Area Planning Agency (MAPA) have been formally designated by their respective legislative bodies to act as the official representative in planning matters of mutual concern; and,

WHEREAS, MAPA is the designated Metropolitan Planning Organization (MPO) for the Omaha-Council Bluffs Transportation Management Area (TMA); and,

WHEREAS, it is the responsibility of the MPO, in conjunction with the States, to certify that the transportation planning process complies with all applicable federal laws and regulations; and

WHEREAS, a fiscally constrained and prioritized Transportation Improvement Program (TIP) for intermodal planning is required by the U.S. Department of Transportation (DOT) and was developed by the MPO for the Omaha-Council Bluffs metropolitan area; and,

WHEREAS, the Fiscal Year 2027 - 2032 Transportation Improvement Program (TIP), which defines the capital improvements for streets, highways, transit, enhancements and airports for the jurisdictions in the TMA for a six-year period, and having been submitted for public review according to MAPA's public participation procedures, has been given due consideration by the MAPA Board of Directors; therefore be it

RESOLVED, that MAPA approves the FY 2027 - 2032 TIP, and recommends said program be forwarded to the appropriate state and federal agencies.

PASSED this 25th Day of June 2026

Doug Kindig
Chair, MAPA Board of Directors

DRAFT

This Page Intentionally Left Blank

MPO Self Certification

The Nebraska Department of Transportation, the Iowa Department of Transportation, and the Metropolitan Area Planning Agency hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- 1) **23 U.S.C. 134, 49 CFR 5303, and this subpart;**
MAPA collaborates with local, State and public transportation agencies to carry out a continuing, cooperative and comprehensive (3C) metropolitan planning process through its Metropolitan Transportation Plan (MTP), Transportation Improvement Program (TIP), Unified Planning Work Program (UPWP), and other transportation planning activities.
- 2) **In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d) and 40 CFR part 93;**
MAPA is designated as an attainment area. However, MAPA is closely monitoring air quality reports and standards while working on a proactive public outreach and reduced transit fare initiative to reduce ozone with local agencies, NDOT, Iowa DOT, NDEQ, IDNR, EPA and Metro Transit of Omaha.
- 3) **Title VI of the Civil Rights act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;**
MAPA recently updated its Title VI plan and outreach efforts to better serve and involve the protected classes under Title VI of the Civil Rights Act of 1964.
- 4) **49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;**
MAPA's Public Participation Plan (PPP) guides MAPA's outreach efforts to ensure that no person is discriminated against on the basis of race, color, creed, national origin, sex or age in the transportation planning process. This applies to MAPA's MTP, TIP, UPWP, and other transportation planning activities.
- 5) **Section 1101(b) of the MAP-21 (Pub. L. 112-141) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;**
MAPA maintains a recently updated Disadvantaged Business Enterprise (DBE) Program including agency DBE contract goals.
- 6) **23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;**
MAPA does not receive Federal-aid highway construction funds and does not let construction contracts. With regard to other transportation planning activities, see above comments under point 4.
- 7) **The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C 12101 et seq.) and 49 CFR parts 27, 37, and 38;**
- 8) **The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;**
- 9) **Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and**
- 10) **Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.**
MAPA has an Equal Employment Opportunity Policy that includes not only prohibiting employment discrimination on the basis of race, color, creed, or national origin, it also prohibits discrimination on the basis of age, non-job related physical or mental disability and gender. This policy also includes all publications and advertisements and our website. MAPA advertises and posts public notices in minority focused news media. These policies pertain to MAPA programs. MAPA's committees are diverse in gender, age, and race and pass recommendations for approval of policies and documents to the MAPA Board of Directors.

MAPA is exempt from the requirements of 23 U.S.C. § 134(d)(2) and 49 U.S.C. § 5303(d)(2), as amended by the FAST Act §§ 1201 and 3003 because: (1) MAPA was organized under the authority of the Neb. Rev. Stat. §§ 13-801 through 13-827 and §§ 28E.1 through 28E.14 of the Iowa Code, which were both in effect on or before December 18, 1991; (2) these laws have not been amended after December 18, 1991, as regards MAPA's structure or organization; and (3) MAPA has not been designated or re-designated after December 18, 1991.

Civil Rights Policy Statement

The Omaha-Council Bluffs Metropolitan Area Planning Agency (MAPA) assures that no person shall on the grounds of race, color, national origin, age, disability, or sex, as provided by Title VI of the Civil Rights Act of 1964 and the Civil Rights Restoration Act of 1987 (P.L. 100.259), be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving federal financial assistance. MAPA further assures every effort will be made to ensure nondiscrimination in all of its programs and activities, whether those programs and activities are federally funded or not.

In the event that MAPA distributes Federal aid funds to another entity, MAPA will include Title VI language in all written agreements and will monitor compliance.

MAPA's Title VI Coordinator is responsible for initiating and monitoring Title VI activities, preparing reports, and other responsibilities as required by Title 23 of the Code of Federal Regulations (CFR) 200 and 49 CFR 21.

Any person who believes they have been aggrieved by an unlawful discriminatory practice under Title VI has a right to file a formal complaint with MAPA. Any such complaint must be in writing and filed with MAPA's Title VI Coordinator within one hundred eighty (180) days following the date of the alleged discriminatory occurrence. For more information, or to obtain a Title VI Discrimination Complaint Form, please see our web site at mapacog.org or contact the Title VI coordinator:

Section 1 - About the Transportation Improvement Program

1.1 Legislative Requirements

The current authorized federal transportation legislation is the Infrastructure Investment and Jobs Act (IIJA). It charges Metropolitan Planning Organizations (MPOs, such as MAPA) with the creation and maintenance of a fiscally-constrained Transportation Improvement Program (TIP). Creating a fiscally constrained TIP requires MAPA to allocate funding to projects based upon reasonable cost estimates, within the limits of reasonably available future revenues, and based upon historical trends. MAPA coordinates with state and local governments and public transit operators to create a TIP that prioritizes and lists all federally-funded and regionally significant transportation projects for at least the next four fiscal years as required by federal regulations. MAPA has chosen to program six years to better coordinate with the six year plans prepared by local jurisdictions for their own infrastructure improvements.

Projects listed in the TIP must be financially realistic and achievable; as such, the first four years of projects in this program are fiscally constrained. Projects are also programmed in years five and six for illustrative purposes, indicating that there are long-term plans to implement these projects, but they are not in the four-year, fiscally-constrained program. These illustrative projects are not guaranteed to be awarded the funding that they have been assigned and are not fiscally constrained. Illustrative projects are shown in the TIP to allow for earlier project phases (such as preliminary engineering and environmental compliance) to occur. See the Project Lifecycle section below for additional details.

Federal regulations require a TIP be updated every four years. Administrative policies of the Nebraska and Iowa Departments of Transportation require MAPA to update the TIP annually. After approval by the MAPA Board of Directors, the TIP is sent to the governors of Nebraska and Iowa, typically represented by NDOT and Iowa DOT, for approval. The Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) also review the TIP and have final approval of State Transportation Improvement Plans (STIPs) which include all local TIPs.

1.2 Definitions

Apportionment – Yearly funds allocated to each state by Congress to design and construct federal aid transportation projects.

Carbon Reduction Program (CRP) Funding - CRP provides funding for projects designed to reduce transportation emissions, defined as carbon dioxide (CO₂) emissions from on-road highway sources. CRP funds are apportioned to states on a formula basis. A portion of this funding is allocated to MPOs.

Carryover – Federal funds which were not spent in a past fiscal year that can be used to pay for projects in future fiscal years.

Coordinated Transit Committee (CTC) – Committee to oversee the use of transit funds from FTA and approves and selects transit projects for disabled citizens, veterans, and seniors throughout the Omaha-Council Bluffs transportation management area.

FAST Act - The Fixing America's Surface Transportation Act was the funding and authorization bill that governed federal surface transportation spending during the period of 2016 through 2021. Its successor is the Infrastructure Investment and Jobs Act (IIJA).

Fiscal Constraint - The ability of a government agency to maintain its current project spending over the course of several fiscal years within the funding available while still keeping a positive budget as well as delivering promised projects.

Fiscal Year – A period used for calculating annual costs and expenditures involving budgeted phases of projects; the beginning of a fiscal year usually differs from a calendar year.

Federal Aid Process – A program administered by the Federal Highway Administration which provides funding for the majority of a transportation project (usually 80% but the percentage can differ) that is constructed by a local public agency while following the rules and regulations involved in receiving federal funds.

Federal Transit Authority (FTA) – The agency within the US Department of Transportation that provides financial and technical assistance to local public transit systems.

Federal Highway Administration (FHWA) - A division of the US Department of Transportation that specializes in highway transportation and provides guidance and approval for all of the region's federal funds as well as the Federal Aid Process.

Infrastructure Investment and Jobs Act (IIJA) - IIJA, also known as the Bipartisan Infrastructure Law (BIL), is the funding and authorization bill that governs federal surface transportation spending and is the source of all federal funds that the region receives.

Intelligent Transportation Systems (ITS) – Systems that use computer, electronics, and communications technologies and management strategies – in an integrated manner – to provide traveler information that increases the safety and efficiency of the surface transportation system. ITS also provides useful, real-time information to system operators.

Iowa Department of Transportation (Iowa DOT) - The statewide agency that administers federal funding allocation and apportionment for FHWA for all federally funded projects in the State of Iowa.

MAP-21 - The Moving Ahead for Progress in the 21st Century Act (MAP-21) is the previous funding and authorization bill (prior to the FAST Act) that governs federal surface transportation spending and is the source of all federal funds that the region receives.

Metropolitan Planning Organization (MPO) – A planning body required by the federal government which is responsible for the transportation planning and project selection in its region. It provides a forum for cooperative decision making for the metropolitan planning area. The governor designates an MPO in every urbanized area with a population of more than 50,000. MAPA has been designated the MPO for the Omaha-Council Bluffs Transportation Management Area (TMA) by the governors of both Nebraska and Iowa.

Metropolitan Transportation Plan (MTP) - A comprehensive plan projecting the transportation needs for the Omaha-Council Bluffs metro area over the next 25 years through projects, plans, projections, and proposed solutions to improve movement of goods and people throughout the area. Additionally, in order to be eligible for federal funding and projects must be listed in the MTP as required by the Federal Highway Administration.

National Environmental Protection Act (NEPA) – Law signed by Congress in 1969 that guides all federal government agencies to prepare documentation of the environmental effects of proposed federal aid projects.

Nebraska Department of Transportation (NDOT) – The statewide agency that administers federal funding allocation and apportionment for FHWA for all federally funded projects in the State of Nebraska.

Obligation – Money that has been approved by the Federal Highway Administration and either NDOT or Iowa DOT and set aside for a particular project. The money is usually reserved for several years as long as the project it was reserved for is still active.

Project Selection Committee (ProSeCom) - Manages the surface transportation funds from FHWA and approves and selects road, bridge, and maintenance projects throughout the Omaha-Council Bluffs transportation management area.

Surface Transportation Block Grant (STBG) Funding – The transportation funds apportioned by Congress and designated to MAPA through NDOT and Iowa DOT to construct road, bridge, and maintenance projects in the transportation management area.

SWAP – Iowa DOT program to exchange Federal-aid for Primary Road Funds; this program was discontinued during the development of the FY2023 TIP. Projects beyond FY2023 will no longer be SWAP-eligible.

Title VI – Section of the Civil Rights Act of 1964 that stating, “No person in the United States shall, on the grounds of race, color or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance”

Transit - Shared public passenger transport service which is available for general public use, distinct from modes such as taxis or carpooling, that follow prescribed routes or regular schedules. Public transport modes include buses, trolleys, bus rapid transit, trams, trains, airlines, and light rail systems.

Transportation Alternatives Program (TAP) Funding – The transportation alternative funds (formerly the Transportation Enhancement program) designated to MAPA through NDOT and Iowa DOT to construct projects in the transportation management area.

Transportation Alternatives Program Committee (TAP-C) - Manages the transportation alternative funds from FHWA and approves and selects trail, bicycle, pedestrian, and multi-modal projects throughout the Omaha-Council Bluffs transportation management area.

Transportation Improvement Program (TIP) - A 6-year financial program that describes the schedule for obligating federal funds to state and local projects. State, regional and local transportation agencies update the program each year to reflect priority projects in the metro area. The TIP has four years of fiscally constrained projects and two later years called illustrative years where the projects have not been ranked or scored.

Transportation Management Area (TMA) – The area within the greater Omaha-Council Bluffs Metropolitan Area where MAPA administers federally funded projects. The area is defined as Douglas and Sarpy Counties in Nebraska and the urbanized areas of western Pottawattamie County in Iowa.

Transportation Technical Advisory Committee (TTAC) – A committee of local experts and elected officials that guides continuing, comprehensive and coordinated transportation planning in the Omaha-Council Bluffs area. The committee also coordinates with its subcommittees such as the CTC and ProSeCom and participating state and federal agencies to implement the transportation improvement program by giving recommendations to the MAPA Board of Directors.

U.S. Department of Transportation (DOT) – The federal cabinet-level agency with responsibility for highways, mass transit, aviation, and ports. It is headed by the Secretary of Transportation. The DOT includes the FHWA and FTA among others.

1.3 Regional Transportation Funding

The Infrastructure Investment and Jobs Act (IIJA) and previous transportation authorizations use the term suballocation to refer to portions of the federal funds apportioned to a State that must be used in specific areas within the State. MAPA receives an annual suballocation of funds for the following programs:

Surface Transportation Program Block Grants (STBG)

STBG funds a wide range of projects including construction, maintenance, and other projects on streets, highways, and bridges. STBG funding is extremely flexible and can be utilized for other projects including capital transit projects, enhancement projects, transportation demand management projects (e.g. carpool and vanpool), safety improvements, planning studies, natural habitat and wetlands mitigation efforts, and intelligent transportation systems (ITS) improvements, among others.

The MAPA Region receives funding from both the Nebraska and Iowa allocations of STBG. Note that the period of availability of these funds runs for the year of apportionment (the first year of the TIP) plus three subsequent fiscal years. Therefore, funding apportioned to the MAPA region in FY2027 is available to be spent from FY2027 to FY2030.

Beginning in FY2019, some projects in the Iowa portion of MAPA's TMA became eligible for Iowa DOT's Swap program. Projects that would have received STBG funds can swap those funds for Iowa Primary Road funds. In the development of the FY2019 program, representatives from MAPA and Iowa DOT met to review upcoming projects and identify candidates for Swap. MAPA has agreed to participate in the Swap program and projects identified as eligible in coordination with Iowa DOT are marked as 'STBG-MAPA (Swap)' in the project tables in Section 5. SWAP is being discontinued with the passing of the IIJA. Projects identified as SWAP will be eligible to continue through fiscal year 2023, but projects letting in future years will not be SWAP eligible.

Transportation Alternatives Program (TAP)

TAP projects are federally funded, community-based projects that expand travel choices and enhance the transportation experience by integrating modes and improving the cultural, historic, and environmental aspects of our transportation infrastructure. Much like the STBG-MAPA program, funding for these projects is suballocated to the MAPA region by the states. TAP projects must be one of several eligible activities and must relate to surface transportation, including the following:

Pedestrian and Bicycle Facilities (including ADA improvements)
Safe Routes for Non-Drivers
Conversion of Abandoned Railway Corridors to Trails
Scenic Turn-Outs and Overlooks
Outdoor Advertising Management
Historic Preservation & Rehabilitation of Historic Transportation Facilities

Vegetation Management
Archaeological Activities
Environmental Mitigation
Stormwater Mitigation
Wildlife Management

Carbon Reduction Program (CRP)

CRP projects are federally funded, community-based projects that focus on reducing transportation emissions and include TAP-eligible projects, development of alternative fuel infrastructure, and other efforts to aid in adoption of alternative transportation. Much like the STBG-MAPA program, funding for these projects is suballocated to the MAPA region by the states.

FTA Section 5310 - Enhanced Mobility of Seniors and Individuals with Disabilities

Section 5310, Federal Transit Act (49 U.S.C. §5310), authorizes the Secretary of the USDOT to make grants for the provision of transportation services meeting the special needs of seniors and individuals with disabilities. Generally, funds from this program can be used for operating expenses by coordinated transit providers and for capital expenditures such as new vehicles, automatic vehicle location (AVL) systems, and other equipment purchases.

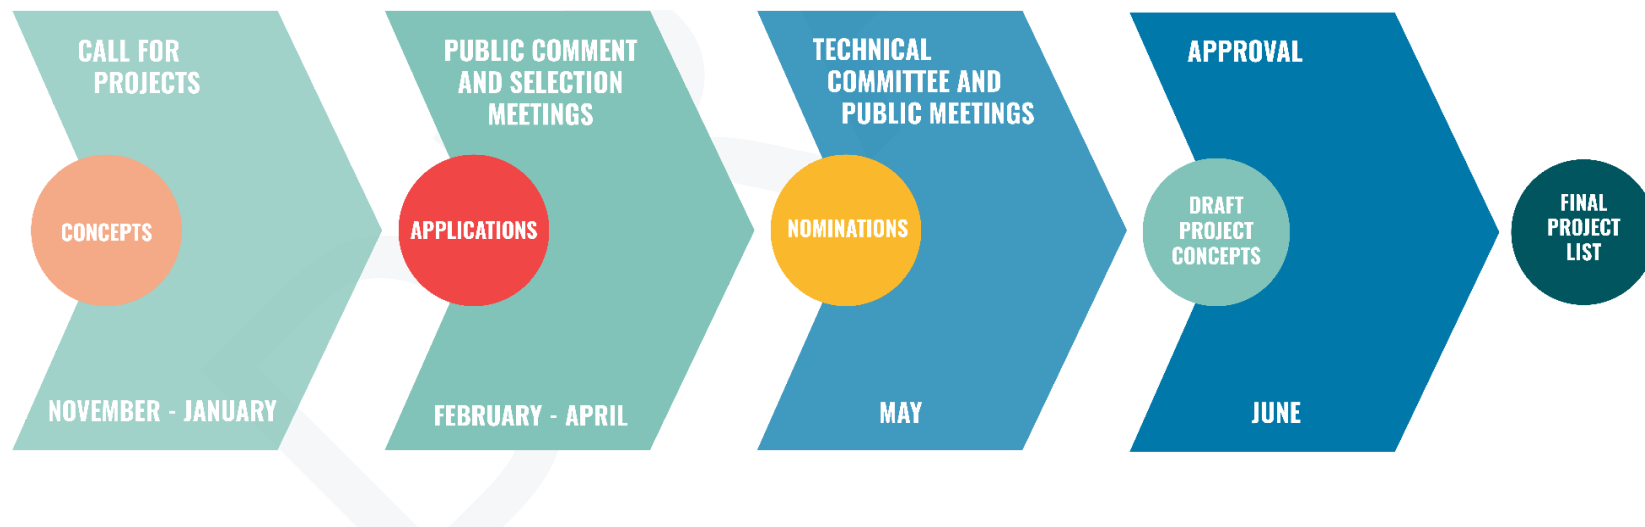

MAPA has been designated by the governors of Nebraska and Iowa to administer the Section 5310 program for the Omaha-Council Bluffs region. The Coordinated Transit Committee oversees the development of MAPA's Coordinated Transportation Plan (CTP) – the guiding document for the Section 5310 program's administration.

Under the IIJA, MAPA receives approximately \$900,000 of Section 5310 funding annually from FTA to fund these kinds of projects throughout the metropolitan region.

Section 2 - Project Selection

2.1 General Process and Selection Criteria

The transportation planning processes described above informs the project selection process for MAPA's TIP. Projects are chosen on the basis of public input, Long Range Transportation Plan goals, the Congestion Management Process, and continuous efforts by MAPA jurisdictions to monitor and address safety, signalization, operations, and maintenance needs. Project selection methodology differs depending on the funding program and location. The graphic below displays the timeline for selecting projects for inclusion in the TIP. Project selection processes differ based upon the jurisdiction leading the process, but all Federal-Aid projects in the MAPA MPO area must ultimately be approved by the Transportation Technical Advisory Committee and the MAPA Board of Directors.

MAPA staff releases project applications for public comment via the MAPA website, Facebook, Twitter, a paid public notice, and a press release. The Project Selection Subcommittee (ProSeCom - STBG), Transportation Alternatives Program Committee (TAP-C - TAP), and the Coordinated Transit Committee (CTC - 5310) evaluate projects for their following the public comment period. MAPA staff members compile the project rankings and present them to the appropriate selection committee for review during Project Selection meetings. During these meetings, committees may also consider additional criteria deemed relevant to project selection (existing network continuity, phasing feasibility, socioeconomics, etc.) and select a list of projects. Jurisdictions whose projects are rejected have the opportunity to appeal this decision at a subsequent appeals hearing.

Following project selection, MAPA staff program the selected projects into the TIP based upon their final ranking, available funding, and realistic project phasing. Selected projects are included in the draft TIP which is presented to the public, the Transportation Technical Advisory Committee, and the Board of Directors.

FY2027 Project Selection Schedule & Public Involvement

MAPA issued a call for projects on October 29, 2025 and accepted applications through January 17, 2026. Project selection proceeded according to the following schedule:

- Open the Call - October 29, 2025
- Applications Due - January 17, 2026
- Public Comment Period for Applications - February 17, 2026 - March 14, 2026
- Project Selection Meetings - March/April 2026
- TTAC & Board Review of Draft TIP - May 2026
- Public Comment Period for the Draft TIP - May & June 2026
- TTAC & Board Approval of Final TIP - June 2026
- Award Notifications - July 2026

10 comments were received on proposed projects. An analysis of the feedback is included with this TIP as Appendix A.

The draft TIP was released for public comment on May 28, 2026. This section will be updated with the results of this comment period when the final TIP is approved on June 25, 2026.

2.2 Project Selection Criteria

MAPA's Project Selection Policy Guide

For more information regarding project selection criteria and other project selection related items, please see MAPA's [Project Selection Policy Guide](#).

5310 Selection Criteria

Section 5310 projects are evaluated based on their contribution to the region. Determination of a program's regional significance is based on ridership, service availability, service type (medical, employment, education, general living, and/or recreational), and sustainability (the ability to carry on the program in the absence of 5310 funds). More details about the 5310 selection process can be found in MAPA's Section 5310 Program Management Plan located on our website at <http://mapacog.org/reports/5310-program-management-plan/>

2.3 TIP Fee

Beginning July 1, 2018, MAPA will collect a "TIP fee" for federal-aid projects in the Transportation Improvement Program (TIP) funded through the regional Surface Transportation Block Grant Program (STBG) and the regional Transportation Alternatives Program (TAP). Beginning July 1, 2024, MAPA will collect a "TIP fee" for federal-aid projects in the Transportation Improvement Program (TIP) funded through the regional Carbon Reduction Program (CRP). These funding sources are identified in the TIP as STBG-MAPA, TAP-MAPA, and CRP-MAPA, respectively. The fee will be collected from members that are within the Transportation Management Area (TMA), also referred to as the Metropolitan Planning Organization (MPO). The amount of the TIP fee and the specific federal funding programs for which the fee is required shall be identified in the TIP annually and approved by the Board of Directors.

The TIP fee applies to all project phases programmed in the implementation year of the TIP. The implementation year refers to the first year of the TIP program, which begins October 1 annually. Total obligations for implementation year projects will be identified by end of year reports from the Nebraska and Iowa Departments of Transportation. Invoices for TIP fees will be issued no later than November 30th of the following fiscal year. Therefore, TIP fees related to obligations in FY2020 will be assessed by November 2020. Failure to pay the TIP fee could result in project removal from the TIP or reprogramming to an illustrative year of the TIP program.

The Executive Director shall have the ability to provide payment terms of up to 2 years of the assessed TIP fee. Any adjustments to the payment terms beyond 2 years or change in the assessed amount shall be presented to the MAPA Board of Directors for approval.

The TIP fee does not apply to projects utilizing other funding sources that are included in the TIP (State projects, transit projects, HSIP/TSIP, CMAQ, etc.). STBG-MAPA, TAP-MAPA, and CRP-MAPA projects with total project costs less than \$100,000 and all planning studies shall be exempt from the TIP fee.

The amount of the TIP fee shall be one percent (1%) of the federal funds on a project up to \$10,000,000. Projects with more than \$10,000,000 of federal funding will be assessed one percent (1%) of the first \$10,000,000 and one-half percent (0.5%) for the amount over \$10,000,000.

The TIP fee must be paid with non-federal funds according to federal matching requirements. The TIP Fee is not an eligible cost for Federal aid or Swap reimbursement.

2.4 Other Federal Transportation Programs

The majority of Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) program funds in the TIP are not directly suballocated to MAPA. In general, NDOT, Iowa DOT, and Metro Transit make programming decisions for these funding programs and MAPA cooperates with the states and local jurisdictions to program the projects in the TIP appropriately.

Congestion Mitigation and Air Quality (CMAQ)

The CMAQ program was implemented to support surface transportation projects and other related efforts that contribute air quality improvements and provide congestion relief.

Highway Safety Improvement Program (HSIP)

HSIP is a core Federal-aid program designed to reduce traffic fatalities and serious injuries on all public roads, including non-State-owned roads and roads on tribal lands.

System Preservation Projects

These include state-directed projects for maintenance of highways and bridges in the region. These typically use state STBG funds outside of those apportioned to the Omaha-Council Bluffs region.

Federal Transit Administration Projects

Federal funding for transit projects under Sections 5339 - Bus and Bus Facilities and 5307 - Urbanized Area Formula - are directed to Metro Transit to support their operations.

Federal Aviation Administration Programs

In addition to surface transportation projects, the MAPA TIP also includes a list of projects programmed by the Federal Aviation Administration (FAA) of the USDOT. Beginning with the FAST Act, federally funded airport improvement projects must be contained in the regional Transportation Improvement Plan. For that purpose, MAPA coordinates annually with the Omaha Airport Authority to ensure that regionally significant projects are included within the Transportation Improvement Program.

2.5 Performance Based Planning Measures

Beginning with the FAST-Act, federal law requires states and MPOs to use performance based transportation planning practices. MPO TIPs must document compliance with each of the performance based planning categories. Categories currently implemented include Safety (PM 1), Transit Asset Management (TAM), Pavement and Bridge Condition (PM 2), and System and Freight Reliability (PM 3). In addition, MAPA supports Iowa and Nebraska DOT's system and freight reliability targets by reviewing and programming all Interstate and National Highway System projects within the MPO boundary that are included in the DOT's Transportation Improvement Program.

MPOs establish performance targets for each of these measures by either:

1. Supporting the State DOT Performance Targets; or
2. Establishing its own Regional Performance Targets.

MAPA relied on input from stakeholder committees in order to determine whether to support state DOT targets, or to develop separate targets for the MAPA region. When the determination was made to adopt separate regional targets, these committees were reconvened to assist in establishing those targets based on five-year trend data.

Safety Performance Measures

Compliance with safety performance based planning requirements began May 27, 2018 for MPOs. To satisfy the safety performance measure MPOs can choose to support the DOT safety targets or MPOs can set their own unique targets. MAPA chose to set its own unique targets for the Omaha-Council Bluffs region.

Any Iowa DOT sponsored HSIP projects within the MPO area were selected based on the safety performance measures set by Iowa DOT and were approved by the Iowa Transportation Commission. The Iowa DOT conferred with numerous stakeholder groups, including MAPA, as part of its target setting process. Working in partnership with local agencies, Iowa DOT safety investments were identified and programmed which will construct effective countermeasures to reduce traffic fatalities and serious injuries. The Iowa DOT projects chosen for HSIP investment are based on crash history, roadway characteristics, and the existence of infrastructure countermeasure that can address the types of crashes present. The Iowa DOT continues to utilize a systemic safety improvement process rather than relying on “hot spot” safety improvements.

The Safety PM Final Rule establishes five performance measures as the five-year rolling averages to include:

1. Number of Fatalities
2. Rate of Fatalities per 100 Million Vehicle Miles Traveled (VMT)
3. Number of Serious Injuries
4. Rate of Serious Injuries per 100 Million VMT
5. Number of Non-motorized Fatalities and Non-motorized Serious Injuries

The Safety Performance Management Measures regulation supports the Highway Safety Improvement Program (HSIP) and requires State Departments of Transportation (DOTs) and Metropolitan Planning Organizations (MPOs) to set HSIP targets for these five safety performance measures. MPOs must establish their HSIP targets by February 27 of the calendar year in which they apply.

As a result of the stakeholder process, MAPA elected to establish its own HSIP targets for safety performance measures. As a bi-state MPO, MAPA coordinated with both the Nebraska Department of Transportation (NDOT) and the Iowa Department of Transportation (Iowa DOT) in the process of adopting its own region-wide targets. Targets for the MAPA region were identified using VMT estimates for all public roads within the planning area to establish rate targets. These targets have since been integrated into the metropolitan transportation planning process and include a description of the anticipated effect of the TIP toward achieving HSIP targets in the MTP, linking investment priorities in the TIP to these safety targets.

MAPA will coordinate with both Nebraska and Iowa DOTs on the manner in which they will report targets to the respective state agencies. A systems performance report evaluating the condition and performance of the transportation system with respect to the safety performance targets described in the MTP will be produced annually by MAPA to NDOT and Iowa DOT.

Performance Period: The 2026 targets are established using the 2020–2024 period as the baseline.

Target Setting: Performance is assessed using a linear fit analysis of the past five years of data, supplemented by policy-based adjustments to align with a regional goal of zero fatalities and serious injuries by 2040.

Method: All measures use a 5-year rolling average to smooth out annual variations. The fatality and serious injury rates are measured per 100 million Vehicle Miles Traveled (VMT).

The following safety performance measures have been adopted by the MAPA Board of Directors:

Table 2.1 - Safety Performance Targets (Baseline and targets are 5-year rolling averages)

Category	Baseline 2024	Projection	Target
1. Number of fatalities	61.8	58.9	56.2
2. Fatality rate	0.867	0.818	0.773

3. Number of serious injuries	457.0	420.1	394.2
4. Serious Injury Rate	6.411	5.836	5.422
5. Number of fatal and series injuries (non-motorized)	52.2	57.5	55.2

Transit State of Good Repair

The Transit Asset Management (TAM) final rule requires transit providers and group TAM plan sponsors to set State of Good Repair (SGR) performance targets within three months after the effective date of the final rule [49 CFR § 625.45 (b)(1)]. MAPA coordinated with Metro Transit and the City of Council Bluffs to review the ages, conditions, and useful life status of equipment, rolling stock and facilities (as applicable). Targets were jointly agreed upon based on the investment program laid out in the FY2018 Transportation Improvement Program (TIP).

Compliance with the FTA final rule on Transit Asset Management (TAM) began on January 1, 2017 for transit providers. FTA's national Transit Asset Management System Rule:

- Defines "state of good repair"
- Requires grantees to develop a TAM plan
- Establishes performance measures
- Establishes annual reporting requirements to the National Transit Database
- Requires FTA to provide technical assistance

Public transit capital projects included in the TIP align with the transit asset management (TAM) planning and target setting processes undertaken by the Iowa DOT, transit agencies, and MPOs. The Iowa DOT established a group TAM plan and group targets for all small urban and rural providers while large urban providers established their own TAM plans and targets. Investments are made in alignment with TAM

plans with the intent of keeping the state’s public transit vehicles and facilities in a state of good repair and meeting transit asset management targets. The Iowa DOT allocates funding for transit rolling stock in accordance with the Public Transit Management System process. In addition, the Iowa DOT awards public transit infrastructure grants in accordance with the project priorities established in Iowa Code chapter 924. Additional state and federal funding sources that can be used by transit agencies for vehicle and facility improvements are outlined in the funding chapter of the Transit Manager’s Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

Metro Transit and the Council Bluffs Specialized Transit Service, in conjunction with MAPA Executive Board approval, have adopted the following SGR targets:

Table 2.2 - Transit State of Good Repair (SGR) Targets

Asset	Target % Exceeding Useful Life Benchmark
Council Bluffs STS	
Rolling Stock	25.000
Metro Transit	
Articulated	0.00
Bus	34.00
Cutaway (Van)	0.00
Auto	100.00
Facilities	Maintain a condition rating above 2 on the TERM scale.

Pavement and Bridge Performance Measures

Compliance with PM II performance based planning requirements began on May 20, 2019 for MPOs. To satisfy PM II performance measures, MPOs can choose to support State DOT PM II targets or MPOs can set their own unique targets.

Setting a regional target is challenging at present because:

- MAPA lacks a historical dataset from which to forecast a trend

- Differences exist in the data collected and forecasting tools between the two states
- MAPA is not responsible for selecting projects on the National Highway System

MAPA has chosen to support the pavement and bridge targets submitted by the Iowa and Nebraska Departments of Transportation in their most recent baseline period performance reports. The MPO supports these targets by reviewing and programming all Interstate and National Highway System projects within its boundary that are included in the DOTs' Transportation Improvement Programs.

Any Iowa DOT sponsored pavement and bridge projects within the MPO area were determined in alignment with the Iowa Transportation Asset Management Plan (TAMP) and the pavement and bridge performance measures. The TAMP connects Iowa in Motion 2045 and system/modal plans to Iowa DOT's Five-Year Program and the STIP. Iowa in Motion 2045 defines a vision for the transportation system over the next 20 years, while the Five-Year Program and STIP identify specific investments over the next four to five years. The TAMP has a 10-year planning horizon and helps ensure that investments in the Five-Year Program and STIP are consistent with Iowa DOT's longer-term vision. Starting in 2019, the TAMP will also integrate the pavement and bridge performance targets.

The Iowa DOT conferred with numerous stakeholder groups, including MAPA and local owners of NHS assets, as part of its target setting process. The methodology used to set targets used current and historical data on condition and funding to forecast future condition. Asset management focuses on performing the right treatment at the right time to optimize investments and outcomes. Management systems are utilized to predict bridge and pavement needs and help determine the amount of funding needed for stewardship of the system. The TAMP discusses the major investment categories that the Commission allocates funding through. Once the Commission approves the funding for these categories, Iowa DOT recommends the allocation of the funds to specific projects using the processes described in the TAMP. Pavement and bridge projects are programmed to help meet the desired program outcomes documented in the TAMP.

Pavement and bridge targets are established for four year periods with the current period ending in 2025. The following are the state targets MAPA has adopted for PM2:

Table 2.3 A - Iowa DOT Pavement and Bridge Targets

State	Category	Two Year Target	Four Year Target
Iowa DOT	1. Percentage of pavements of the Interstate System in Good condition	55.0	55.0
Iowa DOT	2. Percentage of pavements of the Interstate System in Poor condition	3.0	3.0
Iowa DOT	3. Percentage of pavements of the non-Interstate NHS in Good condition	35.0	35.0
Iowa DOT	4. Percentage of pavements of the non-Interstate NHS in Poor condition	6.0	6.0
Iowa DOT	5. Percentage of NHS bridges classified as in Good condition	52.5	56.0
Iowa DOT	6. Percentage of NHS bridges classified as in Poor condition	5.0	6.6

Table 2.3 B - Nebraska DOT Pavement and Bridge Targets

State	Category	Two Year Target	Four Year Target
Nebraska DOT	1. Percentage of pavements of the Interstate System in Good condition	65.0	65.0
Nebraska DOT	2. Percentage of pavements of the Interstate System in Poor condition	5.0	5.0
Nebraska DOT	3. Percentage of pavements of the non-Interstate NHS in Good condition	40.0	40.0
Nebraska DOT	4. Percentage of pavements of the non-Interstate NHS in Poor condition	10.0	10.0
Nebraska DOT	5. Percentage of NHS bridges classified as in Good condition	55.0	55.0
Nebraska DOT	6. Percentage of NHS bridges classified as in Poor condition	10.0	10.0

System and Freight Reliability Performance Measures

As a result of the stakeholder process, MAPA elected to establish its own targets for system and freight reliability performance measures, and as a bi-state MPO, MAPA coordinated with both the Nebraska Department of Transportation (NDOT) and the Iowa Department of Transportation (Iowa DOT) in the process of adopting its own region-wide targets. These targets have since been integrated into the metropolitan transportation planning process and include a description of the anticipated effect of the TIP toward achieving system reliability targets in the MTP, linking investment priorities in the TIP to these reliability targets.

MAPA will continue to coordinate with both NDOT and the Iowa DOT on the manner in which they will report targets to the respective state agencies. A systems performance report evaluating the condition and performance of the transportation system with respect to the reliability performance targets described in the MTP including progress achieved by MAPA in achieving reliability performance targets will be produced annually by MAPA to NDOT and Iowa DOT.

MAPA has elected to adopt their own targets for system reliability, given many differences between the urban nature of the metropolitan area compared to statewide metrics in Nebraska and Iowa. These targets were developed based upon traffic and congestion data 5-year trends within the metro and were calculated based upon projected travel and corrective action.

The Iowa DOT conferred with numerous stakeholder groups, including MAPA, as part of its target setting process. Variability within the existing travel time dataset was used to forecast future condition. Projects focused on improving pavement and bridge condition also often help improve system reliability and freight movement. Additional projects focused specifically on improving these areas of system performance are developed in alignment with the target-setting process for related performance measures, and the freight improvement strategies and freight investment plan included in the State Freight Plan. This plan includes a detailed analysis and prioritization of freight bottlenecks, which are locations that should be considered for further study and possibly for future improvements. The process also involved extensive input from State, MPO, RPA, and industry representatives. State projects identified in the freight investment plan and programmed in the STIP were highly-ranked freight bottlenecks.

Following a mid-period review, MAPA has chosen to modify the Non-Interstate and Freight Travel Time Reliability targets. These targets were adopted by the MAPA Executive Board in December of 2021. The 4-year targets listed below will end in 2025.

Table 2.4 - System and Freight Reliability Targets

Category	Two Year Target	Four Year Target
1. Interstate Travel Time Reliability	98.0	98.0
2. Non-Interstate Travel Time Reliability	96.5	96.5
3. Freight Travel Time Reliability	1.26	1.25

Transit Safety Performance Measures

Compliance with transit safety performance based planning requirements begins on July 20, 2021. To comply with the transit safety performance measures MPOs can choose to support the targets set by their local large urban transit provider(s) or set their own unique targets. MPOs should include the following language to ensure TIPs are compliant with transit safety requirements.

Public transit projects included in the STIP align with the transit safety planning and target setting processes undertaken by the transit agencies and MPOs. While the Iowa DOT provided assistance with the development of initial Public Transportation Agency Safety Plans (PTASPs), each large urban transit provider is responsible for implementing its PTASP, which includes transit safety targets. Investments are made in alignment with PTASPs with the intent of

keeping the state's public transit operations, vehicles, and facilities safe and meeting transit safety targets. State and federal funding sources that can be used by transit agencies for operations, vehicles, and facility improvements are outlined in the funding chapter of the Transit Manager's Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

The Omaha, Nebraska Metro Public Transportation Agency Safety Plan (PTASP) Revision 1, was approved by the Transit Authority of the City of Omaha, DBA, Metro Transit on December 10, 2020. Safety performance measures included therein were adopted without modification by the MAPA Board of Directors in April, 2021.

The transit safety performance measures for fixed route service are listed below in Table 2.5, and the paratransit measures in Table 2.6:

Table 2.5 - Fixed Route Transit Safety Targets

Organization	Category	Baseline	Target
Metro Transit	System Reliability (Total VRM Between Failures)	1406.000	Increase From Baseline
Metro Transit	Safety Events Per 100,000 VRM	0.211	Reduction From Baseline
Metro Transit	Safety Events Total	8.400	Reduction From Baseline
Metro Transit	Injuries Per 100,000 VRM	0.024	Reduction From Baseline
Metro Transit	Injuries Total	9.400	Reduction From Baseline
Metro Transit	Facilities Per 100,000 VRM	0.000	0
Metro Transit	Facilities Total	0.000	0

Table 2.6 - Paratransit Safety Targets

Organization	Category	Baseline	Target
Metro Transit	System Reliability (Total VRM Between Failures)	2718.000	Increase From Baseline
Metro Transit	Safety Events Per 100,000 VRM	0.025	0
Metro Transit	Safety Events Total	0.200	0
Metro Transit	Injuries Per 100,000 VRM	0.025	0
Metro Transit	Injuries Total	0.200	0
Metro Transit	Facilities Per 100,000 VRM	0.000	0
Metro Transit	Facilities Total	0.000	0

2.6 Revisions to the TIP

Amendments

Amendments involve major project changes including the addition or deletion of a project, substantial cost changes, moving a project in or out of the four fiscally-constrained years, or a major change in design concept or scope change. MAPA considers the following to be major changes:

- For Nebraska projects, increasing a project's cost by 20% or \$5 million, whichever is greater

MAPA FY2027 - 2032 Transportation Improvement Program

- For Iowa projects, increasing a project's federal aid by 30% or \$2 million
- For Iowa projects, adding an additional federal funding source
- Adding a project to, or removing a project from the four-year program
- Substantially changing the scope or termini of a project (for Iowa projects, any increase in the scope will be an amendment)

Amendments require public review and re-demonstration of fiscal constraint. Formal amendments should be submitted to MAPA staff at least two weeks prior to one of the eleven regularly scheduled meetings of the Transportation Technical Advisory Committee (TTAC). Staff will review the amendment for impact on fiscal constraint and other factors and present the proposed amendment to TTAC. The amendment is then considered by the MAPA Board of Directors and submitted to the state DOTs and FHWA/FTA for final approval and incorporation into the Statewide Transportation Improvement Programs (STIP).

TIP amendment requests which may drastically alter the fiscal constraint of MAPA's regional funding and/or constitute a "new project" based on major scope changes may be recommended to MAPA's project selection committees to be prioritized in the next application cycle. In general, reconsideration of a project in this way would only occur when requests would greatly exceed the base TIP amendment thresholds or when construction costs increase 100% or more.

Administrative Modifications

Administrative modifications involve minor changes to TIP projects. These include any changes that do not meet the criteria listed for an amendment. For instance, if a project is moved from the third year to the second year within the fiscally-constrained TIP it would not constitute a "major" change and thus, would not trigger an amendment. Other examples of revisions that would be eligible for an administrative modification include cost changes that are less than amounts described above, minor changes to project descriptions, or splitting an entry already in the TIP, where the intent is not to add a new project that is distinct from the original TIP entry, but to more smoothly implement the original TIP entry.

To process the Administrative Modification, MAPA submits a letter with the proposed project change to NDOT and FHWA/FTA, and for projects in Iowa, MAPA submits proposed project modifications through the Transportation Project Management System (TPMS). After approval, the changes will be made in the MAPA TIP document and the Statewide Transportation Improvement Programs (STIP).

Projects that are eligible as administrative modifications can still be changed as an amendment. MAPA staff reserve the right to process a proposed revision as an amendment even if a project qualifies as an administrative modification.

Examples of Administrative Modifications include:

- Changing the source of federal-aid for a project
- Minor changes to the scope or termini of a project
- Moving a project within the fiscally constrained years (not into or out of)
- Minor changes to the text, such as corrections or clarifications

Emergency Amendments

Occasionally, situations may arise when an emergency amendment to the TIP is necessary. These are processed on an expedited basis due to circumstances which cannot wait for the next TTAC or MAPA Board meeting. For example, the American Recovery and Reinvestment Act of 2009 (“Stimulus”) required several changes to cost estimates in the TIP to be made in an expedited manner in order to meet deadlines and remain eligible for federal funding. Such amendments are only allowed by MAPA in cooperation with the States of Nebraska and Iowa, FHWA/FTA, and the local jurisdictions involved with the project(s). Emergency amendments are not used as a means of circumventing review by TTAC or the public, but are only utilized in response to truly extraordinary circumstances in which expedited processing of an amendment of a non-controversial matter is necessary.

If all parties involved with a project agree that an emergency amendment is necessary, then the amendment and documentation will be prepared by MAPA staff. TTAC voting members will be notified of the proposed emergency amendment and a meeting will be scheduled. In accordance with the Open Meetings Laws of both Iowa and Nebraska, MAPA will provide 24 hours of advance notice of any emergency meeting in public places and on the MAPA website. Following the emergency TTAC meeting, the MAPA Board of Directors will consider any emergency amendments. Emergency amendments may be considered at a regularly scheduled Board or TTAC meeting, specially-convened meetings, or by voice vote via telephone or a videoconference. If teleconferencing or videoconferencing technology is to be used to conduct a voice vote, locations at which the public can hear and participate in the emergency meeting will be noted in the meeting notice. Teleconferencing or videoconferencing will only be used when a meeting of the full Board or TTAC is impractical, and at least one Board or TTAC member will be present at the location where the public is gathering to participate in the meeting. In all cases, the emergency circumstances necessitating the meeting and the use of teleconferencing or videoconferencing technology will be noted in the meeting agenda and minutes.

Section 3 - Fiscal Constraint

3.1 Background and Assumptions

MAPA's Transportation Improvement Program (TIP) includes a financial plan that provides reasonable estimates for costs, revenues, and strategies for the projects and programs identified in the TIP. Here we assess the project costs by funding program and compare them to the anticipated revenues in each funding program. MAPA's TIP must be fiscally-constrained, meaning that project costs must not exceed reasonably anticipated funding revenues.

The fiscal constraint analysis in this TIP is dependent upon figures provided by the USDOT, the Federal Highway Administration (FHWA), the Iowa Department of Transportation (Iowa DOT), and the Nebraska Department of Transportation (NDOT). For Federal-Aid projects in the MAPA region, local jurisdictions are identified and the specific matching funds required for the Federal-Aid program are allocated by project.

This TIP also identifies the "operations and maintenance" expenditures by jurisdiction as required by the IJA, the current authorizing legislation for the Federal-Aid Highways Program (FAHP). Operations and maintenance expenditures are the total of the day to day cost to keep the system functioning. Example operations and maintenance projects include resurfacing, restoration, and rehabilitation projects (3R projects) and other incidental capital and operations costs necessary to deliver an efficient and effective transportation system.

Year of Expenditure Calculations

To give the public a clear picture of what can be expected (in terms of project cost) as well as to properly allocate future resources, projects beyond the first year of this TIP are adjusted for inflation. When project costs have been inflated to a level that corresponds to the expected year of project delivery this means that the project has been programmed with year of expenditure (YOE) dollars. YOE programming is required by federal law and the MPO is responsible for programming costs in the YOE. MAPA anticipates a 4 percent annual rate of inflation over the period of this TIP. This estimate is based upon the Consumer Price Index, published by the US Bureau of Labor Statistics. This 4 percent rate is added to each project's costs annually and can be seen in the fiscal constraint tables for each fiscal year for both FTA and FHWA's funding programs. During the period of 2021-2025, the CPI grew nationally by 4.5 percent on average annually. This figure includes the extraordinary CPI growth of 8% from 2021 to 2022. MAPA is using discretion in excepting this year and instead assuming an average CPI growth of 3.5% annually.

Revenue Estimation

Revenue estimates for STBG-MAPA funding are also included in this document. MAPA relies upon estimates from Iowa DOT and NDOT for annual apportionments of federal funding. These estimates are based upon formulas in the IIJA and are further subject to the obligation limitation. The obligation limitation is a percentage of the overall federal apportionment that can be spent in a given year. For the previous 5 years, the obligation limitation has been between 92% and 98% of the total apportionment level. This means that of the total funding apportioned to a state in a given year the state may only spend between 92% and 98% of that total balance in its various programs. This obligation limitation is a safeguard that is utilized to ensure that funding exists for all states and programs in a given year.

Each year prior to development of the Iowa DOT's Five-Year Program and the Statewide Transportation Improvement Program both state and federal revenue forecasts are completed to determine the amount of funding available for programming. These forecasts are a critical component in the development of the Five-Year Program and as such are reviewed with the Iowa Transportation Commission. The primary sources of state funding to the DOT are the Primary Road Fund and TIME-21 Fund. These state funds are used for the operation, maintenance and construction of the Primary Road System. The amount of funding available for operations and maintenance are determined by legislative appropriations. Additional funding is set aside for statewide activities including engineering costs. The remaining funding is available for right of way and construction activities associated with the highway program.

Along with the state funds, the highway program utilizes a portion of the federal funds that are allocated to the state. A federal funding forecast is prepared each year based on the latest apportionment information available. This forecast includes the various federal programs and identifies which funds are allocated to the Iowa DOT for programming and which funds are directed to locals through the MPO/RPA planning process, Highway Bridge Program, and various grant programs. Implementation of a federal aid swap will increase the amount of federal funds that are utilized by the Iowa DOT. Additional insight into Iowa DOT's programming process can be found at <https://iowadot.gov/iowa-dot-grants-programs-funding-guide/future-programs/five-year-highway-program>.

3.2 Fiscal Constraint and Federal Funding Tables

The tables below list the total federal funding amounts programmed in MAPA's TIP for each federal funding program by year and demonstrate fiscal constraint across all of MAPA's federal programs. The tables list the expected revenues (annual obligation) and expenditures (programmed funds) for the four fiscally constrained years of the MAPA TIP. Funding targets are provided annually by Iowa DOT and NDOT for programming purposes. Spending Authority includes the beginning balance.

Federal Funding Summary by Program

3.3 Advance Construction

Advance Construction (AC) provides flexibility to locally fund projects and later convert to federal funds. AC projects are selected in coordination with the Nebraska and Iowa DOT offices of program management. Existing AC projects are shown below.

Table 3.10 - Advance Construction Projects (funding in \$1,000s)

Advance Construction Project	Phase	Local Funding
Omaha 2026 Major Streets Resurfacing	UTIL-CON-CE (AC)	\$6,390.20
Omaha 2027 Major Streets Resurfacing	UTIL-CON-CE (AC)	\$8,334.68
	Total	\$8,334.68

Table 3.11 - Advance Construction Conversion (funding in \$1,000s)

Fiscal Year	Count
2026	\$11,402.59
2028	\$17,971.61
2030	\$2,263.99
Sum	\$31,638.19

3.4 Operations & Maintenance

The figures below were developed in consultation with state and local governments. Federal-aid and non-federal-aid estimates were derived by dividing the total operations and maintenance costs based on the mileage on the federal-aid system, as is the practice by Iowa DOT. MAPA estimates an inflation rate of 3 percent per year for operations and maintenance costs. Estimated revenues assume a more conservative growth rate of 2 percent per year. View Iowa DOT’s program at: https://iowadot.gov/program_management/five-year-program.

Each year prior to development of the Iowa DOT’s Five-Year Program and the Statewide Transportation Improvement Program both state and federal revenue forecasts are completed to estimate the amount of funding available for programming. These forecasts are a critical component in the development of the Five-Year Program and as such are reviewed with the Iowa Transportation Commission. The primary sources of state funding to the DOT are the Primary Road Fund and TIME-21 Fund. These state funds are used for the operation, maintenance and construction of the Primary Road System. The amount of funding available for operations and maintenance is determined by legislative appropriations. Additional funding is set aside for statewide activities including engineering costs. The remaining funding is available for right of way and construction activities associated with the highway program. Along with state funds, the highway program

utilizes a portion of the federal funds that are allocated to the state. A federal funding forecast is prepared each year based on the latest apportionment information available. This forecast includes the various federal programs and identifies which funds are allocated to the Iowa DOT for programming and which funds are directed to locals through the MPO/RPA planning process, bridge programs, and other various grant programs. Implementation of a federal aid swap will increase the amount of federal funds that are utilized by the Iowa DOT.

Table 3.12 - Projected Operations & Maintenance FY 2027

	Non-Federal O&M	Federal O&M	Total O&M
Iowa DOT O&M	\$0	\$1,820,547	\$1,820,547

3.5 Federal Transit Administration Programs

Federal-aid transit projects in the MAPA region are funded through the Federal Transit Administration (FTA) of the USDOT. Federal funding for transit projects under Sections 5339 - Bus and Bus Facilities and 5307 - Urbanized Area Formula - are directed to Metro Transit to support their operations, while MAPA receives funding from Section 5310 – Enhanced Mobility of Seniors and Individuals with Disabilities. Federally funded transit improvement projects must be fiscally constrained in the regional TIP and are included in below.

Table 3.19 - Anticipated FTA Funding (in \$1,000s)

Fund Name	2026	2027	2028	2029
5307				
Spending Authority	\$12,935.34	\$13,323.40	\$13,723.10	\$14,134.80

Final Balance	\$1,572.21	\$2,382.60	\$180.29	\$1,160.86

Section 4 - Economic Distribution Analysis

4.1 Population Analysis

To ensure that programs and activities in the MAPA region receiving federal financial assistance are not causing an undue burden on residents with limited means to bear it, MAPA conducted an analysis of census data at the tract level (2010 US Census and 2012-2015 American Community Survey). The analysis reviewed TMA populations to identify Areas of Persistent Poverty (AoPP) as defined by the United States Census Bureau.

4.2 Project Burden/Benefit

Areas of Persistent Poverty were examined in relation to this Transportation Improvement Program's (TIP) fiscally constrained and federally funded roadway & trail projects for potential externalities that may affect these areas adversely. Projects are grouped into categories to evaluate their effects on travel time, pollution, accessibility, and system maintenance. The locations of roadway projects were analyzed for distribution of funding relative to the needs of the region. MAPA compared the Areas of Persistent Poverty to the programmed projects and joined them into one map to show the location of each project relative to the areas with potential concerns. The map overlay can be seen on the next page. Fiscal analysis of projects within and outside of the Area of Persistent Poverty is also done to evaluate the federal spending by project type.

MAPA TIP projects were mapped in a Geographic Information System (GIS) and spatially analyzed for proximity and location within the Areas of Persistent Poverty. Based on the transportation projects' spatial relationship to Areas of Persistent Poverty, the project funding was distributed in a variety of ways. The various spatial relationships and funding distributions are outlined below:

Completely within an Area of Persistent Poverty

Projects located completely within Areas of Persistent Poverty are shown with 100% of the funding affecting such areas.

Completely outside an Area of Persistent Poverty

Projects located completely outside Areas of Persistent Poverty are shown with none of the funding affecting such areas.

Partially within an Area of Persistent Poverty

Projects partially located within Areas of Persistent Poverty had the project funding distributed proportionally. For example, if a one mile long road project had half of its length within Areas of Persistent Poverty, the project is shown with 50% of the funding affecting such areas.

Adjacency to an Area of Persistent Poverty

Many times major roadways are the census tract boundaries that were used in defining Areas of Persistent Poverty (see Appendix D: Demographic Profile of the MAPA TMA for complete methodology of determining Areas of Persistent Poverty). If a transportation project was located on a boundary it is considered adjacent. The project funding was distributed proportionally based on its adjacency. For example, if a one mile long road project had half its length adjacent to an Area of Persistent Poverty, the project is shown with 50% of the funding affecting such areas.

Abutting an Area of Persistent Poverty

When a project begins or ends abutting an Area of Persistent Poverty the project falls within this category. These projects are shown with 10% of the funding affecting such areas.

Non-Spatial Projects

Many projects do not have a single spatial location or a location specific impact. For example, a traffic control center impacts the complete jurisdiction with technology and system management. Furthermore, a traffic signal project may occur at various locations throughout a jurisdiction and these locations cannot be explicitly determined. These types of projects have the funding distributed based on geographic

area proportions of the lead agency jurisdiction boundaries and Areas of Persistent Poverty within that jurisdiction. That is to say that if a non-spatial project from a lead agency has ten square miles of total incorporated area and Areas of Persistent Poverty of two square miles, 20 percent of the project funds will be allocated to the Areas of Persistent Poverty based on this proportion.

4.3 Findings

To assess the level to which Areas of Persistent Poverty will be impacted by the projects listed in this TIP, MAPA staff reviewed the total project listing and assumed benefits and burdens based upon the methodology in this section. Using the methodology described above MAPA makes the following observations.

Distribution

Through analysis of the projects listed in this TIP and the project overlay map it is apparent that in terms of geographical distribution, most location-specific projects fall outside of any Area of Persistent Poverty. Considering the region's anticipated future growth, most of the region's capital roadway projects are located in the suburban and developing areas where new development will require new capacity. The Areas of Persistent Poverty are located in fully developed urban areas and MAPA forecasts little need to increase roadway capacities in these regions. Many traffic counts in the Areas of Persistent Poverty have been declining or remaining stable in recent years. However, several major projects are within or have a spatial relationship to Areas of Persistent Poverty.

Figure 4.2 - TIP Projects & Areas of Persistent Poverty in the MAPA Region

[ANALYSIS IN DEVELOPMENT, FIGURE WILL BE INCLUDED IN THE FINAL TIP]

Table 4.1 - Projects Within Areas of Persistent Poverty

[ANALYSIS IN DEVELOPMENT, FIGURE WILL BE INCLUDED IN THE FINAL TIP]

Section 5 - TIP Project Tables

This section of the TIP includes detailed programming information for all regionally-significant transportation projects identified for the MAPA region. The projects are divided between sub-sections of this chapter based on the following categories:

- Roadway & Trail Projects
- Transit Projects
- Aviation Projects

These categories generally correspond to the three major agencies responsible for funding transportation projects in the MAPA region: the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), and the Federal Aviation Administration (FAA).

5.1 Previous Implementation Year Project Status

Per FHWA and FTA regulations, MAPA has included a status update on the projects programmed in the current implementation year when this TIP was adopted. Information included in this section of the TIP provides a current characterization of the progress made during the current fiscal year for both FHWA- and FTA-funded projects. Table 5.1 below provides a status update for roadway, trail, and transit projects.

Table 5.1 - Previous Implementation Year Projects

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
City of Bellevue	NE-22983	Bellevue 2025 Major Streets Resurfacing	5/14/2026	Project underway in June and July 2026

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
City of Bellevue	TBD	Bellevue Active Mobility Plan		Obligated; project underway
City of Bellevue	NE-22835	2021 Bellevue Resurfacing Project		Completed should be closed out
City of Bennington	NE-22995	Bennington Big Papio Trail		ROW in progress
City of Gretna	NE-22970	204th St & Schram Rd Paving		Sponsor working with NDOT to obligate funds
City of Gretna	TBD	US Hwy 6/NE Hwy 31 Pedestrian Overpass		Sponsor working with NDOT to obligate funds
City of Gretna	NE-22862	Gretna to Wehrspann Trail		Sponsor planning construction in FY2026 with completion expected in 2027
City of La Vista	NE-22977	Thompson Creek Trail		Sponsor submitted for additional funds, still on track for letting in 2028
City of Omaha	192nd & Blondo	Planning		Sponsor REP under review

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
	Improvements Study			
City of Omaha	NE-23000	Center Street Safety and Multi-modal Improvements		Scope agreed working on additional time estimates
City of Omaha	NE-22991	Omaha 2026 Major Streets Resurfacing	2/4/27	NEPA pending approval then moving into final design
City of Omaha	NE-22978	Creighton Bikeway		Sponsor waiting for PIH submittal
City of Omaha	NE-22984	Signal Infrastructure Phase G1	Fall 2027	Under review
City of Omaha	TBD	2025 Omaha Pavement Repair		Sponsor working with NDOT on preliminary phases
City of Omaha	NE-23012	Signal Infrastructure Phase H1		Sponsor submitted for additional funds, still on track for letting in 2028
City of Omaha	NE-23008	Signal Operations South Omaha		Sponsor working on initial phases

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
City of Omaha	NE-23010	Signal Operations Pacific St.		Sponsor working on initial phases
City of Omaha	NE-23013	Signal Infrastructure Phase H2		Funding acquired beginning to scope preliminary phases
City of Omaha	NE-23011	Signal System Master Plan 2.0		Project in development
City of Omaha	NE-22848	33rd & Hamilton Mini Roundabout		Project let; construction ongoing.
City of Omaha	TBD	72nd St & Blondo St intersection improvements		Sponsor working on preliminary phases with NDOT
City of Omaha	TBD	120th St & L St Intersection Improvements		Sponsor working with NDOT and MAPA on form updates
City of Omaha	TBD	42nd & Fontenelle Roundabout		Sponsor working with NDOT and MAPA on form updates
City of Omaha	NE-23006	Levi Carter Park Trail		Sponsor working on scoping for preliminary phases

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
City of Omaha	NE-22924	Midtown Medical Center Bikeway Connection		Sponsor working with NDOT on preliminary phases
City of Omaha	NE-22905	Signal Infrastructure Phase D2		Project Let
City of Omaha	NE-22904	Signal Infrastructure Phase E1		Project Let
City of Omaha	NE-22948	Blackstone Streetscape Improvements	08/25/2026	Project sponsor putting bids out
City of Omaha	NE-22932	24th Street Streetscape Improvements	10/20/2026	Sponsor working on preliminary phases
City of Omaha	NE-22935	Signal Infrastructure Phase F1		Sponsor working on preliminary phases
City of Omaha	NE-22934	Signal Infrastructure Phase E2		Sponsor working on preliminary phases
City of Papillion	NE-22973	Schram Road Parkway		Project is currently under design
Village of Waterloo	NE-22929	River Road Drive & Trail		Project in development; may need construction phase moved to 2027

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
Douglas County	NE-22906	Bridge Replacement - Q St. at Elkhorn River		Project in development; construction expected 2028
MAPA		FY2026 MAPA STBG Regional Planning		Funding obligated; MAPA working on delivering plans & studies.
MAPA	NA	MAPA STBG Planning		MAPA developing project initiation form for NDOT; seeking obligation still in FY2026
MAPA	NA	MAPA 5310 Administration		MAPA continues to administer the 5310 program for the region.
MAPA	NA	Nebraska 5310 Vehicle Purchases		MAPA transmitted vehicle award information to NDOT in March; NDOT applied for funding through TrAMS.
MAPA	NA	Nebraska 5310 Service Contracts		MAPA transmitted TrAMS application for funding in April.
Metro Transit	NA	Electrical Upgrades and Charging Stations Project		TrAMS application submitted

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
Metro Transit	NA	Blair & Fort Calhoun Public Transportation Feasibility Study		TrAMS application submitted
Metro Transit	NA	Support Equipment and Facilities		TrAMS application submitted
Metro Transit	NA	Rolling Stock		TrAMS application submitted
Metro Transit	NA	Transit Enhancements - Shelters		TrAMS application submitted
Metro Transit	NA	Unified Work Program & Planning		TrAMS application submitted
Metro Transit	NA	Capitalized Operations		TrAMS application submitted
Metro Transit	NA	Training		TrAMS application submitted
NDOT	NE-22920	I-80: 72nd St - 84th St, Omaha		Obligated; project underway
NDOT	NE-22921	District 2 DMS Retrofit		Projecting letting this summer

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
NDOT	NE-22922	District 2 DMS Replacement		Projecting letting this summer
NDOT	NE-22939	I-680: Mormon Bridge		Sponsor working on preliminary phases letting in 2028
NDOT	NE-22597B	Bennington East & West		Sponsor working on preliminary phases letting in 2028
NDOT	NE-22958	I-80, I-480 - 13th Street		Sponsor working on preliminary phases letting in 2028
NDOT	NE-22965	District 2 Camera & RWIS Replacement		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22966	District 2 Metro Area Ramp Gates		Sponsor working on preliminary phases letting in 2034
NDOT	NE-22967	District 2 & District 1 Fiber Cleanup		Sponsor working on preliminary phases letting in 2027

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
NDOT	NE-22975	Millard Highlands along I-80		Obligated; project underway
NDOT	NE-22980	WB I-80 Bridge at I-680		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22993	D1 & D2 Variable Speed Advisory		Sponsor working on preliminary phases letting in 2028
NDOT	NE-23007	EV Station - Gretna		Obligated; project underway
NDOT	NE-22910	I-480, N 20th St Sign Structure		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22841	US-6: South 234th St		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22833	N-50: Louisville - Springfield		Obligated; project underway
NDOT	NE-22821	I-80: N-50 - 50th St, Omaha		Obligated; project underway

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
NDOT	NE-22761	US-6: Saddle Creek Rd Bridge		Contract awarded construction anticipated 2028
NDOT	NE-22697	US-75: US-75 Bridges, Bellevue Ph 2		Active Construction
NDOT	NE-22636	N-31: Elkhorn Viaduct		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22597	N-36: 132nd Street - N-133		Active Construction
NDOT	NE-22760	Platte River East		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22857	US-75, Hamilton St.-Fort St.		Sponsor working on preliminary phases letting in 2028
NDOT	NE-22870	US-6, 161st St.-127th St.		Sponsor working on preliminary phases letting in 2028
NDOT	NE-22852	I-680: Pacific to Dodge		Active Construction

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
NDOT	NE-22806	US-275, 38th St Viaduct		Sponsor working on preliminary phases letting in 2028
NDOT	NE-22851	I-680: Irvington Rd - Missouri River		Sponsor working on preliminary phases letting in 2027
NDOT	NE-22860	I-680: Fort St.- Blair High Rd.		Sponsor working on preliminary phases letting in 2029
NDOT	NE-22871	I-80: N-370 to N-50		Sponsor working on preliminary phases letting in 2030
NDOT	NE-22888	US-275: US-275 & W Dodge Rd, Omaha		Active Construction
NDOT	NE-22917	I-80: Sarpy County Interchange		Sponsor working on preliminary phases letting in 2026
NDOT	NE-22919	I-80: Platte River - Millard East		Obligated; project underway
PMRD	NE-22931	Elkhorn River Trail Bridge		

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
PMRD	TBD	West Papio Trail - Millard Connection		MAPA is waiting on sponsor to submit project initiation form; expected sometime before the end of FFY2026.
PMRD	TBD	Sorensen Trail 72nd Street Underpass		MAPA is waiting on sponsor to submit project initiation form; expected sometime before the end of FFY2026.
Sarpy County	TBD	Platteview Road, 132nd Street Intersection Safety Improvements		Sponsor is working with NDOT on preliminary phases
Sarpy County	NE-22951	Sarpy County Concrete Panel Repair		Sponsor is constructing currently expected to complete this summer
Sarpy County	NE-22845	168th St. Hwy 370 - Harrison St.		Sponsor is working on preliminary phases
City of Council Bluffs	IA-55789	9th Avenue Bridge Replacement	9/15/2026	Project on track for letting in September 2026.

Lead Agency	Control #	Project Name	Target Letting/Obligation Date	Status
City of Council Bluffs	IA-58054	Modernization of Traffic Signal Cabinets for Reduced Congestion		The city has not begun development of the project; MAPA is programming the funding in FY2028.
City of Council Bluffs	IA-58053	South Expressway Trail Connection		The city has declined the award; project removed from the FY2027 TIP.
City of Council Bluffs	IA-35677	City/County Connector Trail		The city declined bids in March 2026 and a new letting date of November 2026 was assigned; MAPA has programmed the project in FY2027.
Iowa DOT	IA-57959	I-80 Pavement Rehab		Project let and proceeding to construction.
MAPA	IA-58083	Regional Pavement Data Collection (Iowa)		Funding obligated, data collection proceeding.
Metro Transit	IA-58055	Bus Procurement		Funding transferred from FHWA to FTA; Metro Transit working on obligating funds in TrAMS

5.2 Regionally Significant Roadway & Trail Projects

The next pages include project tables for roadway, trail, and other projects generally eligible for FHWA funding programs. Projects in this section include those selected through MAPA's project selection process, in addition to programs for which the two state departments of transportation (NDOT and Iowa DOT) make decisions. Regionally significant state- and locally-funded projects are also in this section.

Figure 5.1 - TIP Project Map (click the figure to explore projects in a web map)

[MAP IN DEVELOPMENT - TO BE COMPLETED FOR FINAL TIP]

2021-007 NE-22873 Schram Spur N-370 Undercrossing and Trail Segment							
<p>A grade-separated trail undercrossing between 114th and 120th Streets east of Schram Creek is proposed to be constructed underneath N-370. The 260 foot long Schram Spur Undercrossing will be designed to support the future six-lane cross-section of N-370 with a 9-foot x 16-foot reinforced concrete box culvert. Concurrently with proposed undercrossing, Papillion will fund the design and construction of the Schram Creek Spur segment between the N-370 Undercrossing and Lincoln Road. The 10-foot wide concrete trail will provide access to the Lincoln Road on-street bike lanes and SID funded segments of Schram Spur between Schram Road to WP-6 where easements have already been secured by subdivision agreement.</p>

Lead Agency	Fiscal Year	Phase	Fund Source	Total Cost	Federal	State	Local
2023-005 NE-22930 East 6th Street, 72nd - 84th							
<p>This project is 0.65 miles in length and is located on East 6th St in the City of Papillion, Sarpy County, starting 0.21 miles west of the 72nd Stand Cornhusker Rd, extending east to 0.13 miles east of the junction of East 6th St and N Washington St (84th St). Construction may begin and/or end approximately 500 feet ahead of or beyond the actual project limits to accommodate transitioning the pavement. The improvements on this project consist of removal and replacement of existing pavement including curb and paved shoulders where present, modifying lane geometry from a 2 lane segment to a curbed 3 lane segment with a two way left turn lane for the length of the project, and removal and replacement of storm sewers, adjusting utilities to grade, grading, utility relocations, removal and replacement of sidewalks to meet ADA standards, and the addition of 10' wide shared use path on the south side of East 6th St for the length of the project, addition of retaining walls, street lighting, and traffic control devices. Grading will be required for the entire length of this project. This project will not be constructed under traffic. A detour will be provided for pedestrians and vehicles. Work on the designated detour route is not anticipated. Night work is not anticipated. Additional property rights will be required to build this project. Access to adjacent properties will be maintained for most properties during construction but may be limited at times due to phasing requirements. There are a few residential properties with access only to East 6th St that will require additional coordination to determine feasibility of maintaining access and/or duration of loss of access.</p>

2023-006 NE-22906 Bridge Replacement - Q St. at Elkhorn River							
<p>The project will replace the West "Q" Road bridge over the Elkhorn River, immediately west of the 245th Street intersection. A westbound left turn lane would be added along West "Q" Road at 245th Street. The bridge would be wide enough for striping at the 245th Street intersection, to account for the new left turn lane. At each end of the project a taper section would be constructed to match the existing 24' wide West "Q" Road surface. The bridge substructure elements, abutments and piers, would be constructed wide enough to allow for a separated pedestrian facility should be desired at a later date. A pedestrian trail is shown in planning documents through the area, but no detailed plans or locations have been determined.</p>							
In Douglas County, along Q Street on existing alignment over the Elkhorn River.

2023-015 River Road Drive							
<p>Reconstruction of River Road Drive would remove the existing rural section roadway and replace it with a new concrete roadway. The east side will maintain the rural section and the west side (mostly residential) will be converted to an urban section. The curb section is being added to the west side to provide separation and protection for the sidewalk at that location. The existing sidewalk will be removed and replaced as needed to maintain pedestrian access to the area. Storm sewer will be added to pick up storm water along the roadway and the existing ditch on the east side will be cleaned out/rebuilt to improve drainage and reduce standing water.</p>

2023-025 NE-23006 Levi Carter Park Trail							
<p>A multi-use pedestrian and bicycle trail will be built along the north and west sides of Carter Lake in Levi Carter Park in order to improve safety of people walking and bicycling within the park and to better connect the park with the existing regional trail system. The new trail would connect from the existing Locust Street Trail at the intersection of Locust Street and Carter Lake Shore Drive to the existing Riverfront Trail at the northeast section of Levi Carter Park. The total approximate project length is 2.26 miles long. Anticipated construction activity includes: grading; installation of culverts to manage stormwater runoff; construction of retaining walls in areas with cross-slopes; construction of a 10 ft wide, 6-inch thick, concrete trail; and fence installation in areas with retaining walls.</p>

2023-027 NE-22924 Midtown Medical Center Bikeway Connection							
<p>This project will construct a dedicated pedestrian and bicycle connection across Leavenworth Street in order to improve safety and comfort of people traveling on foot or bicycle between the Field Club Trail, the main part of the University of Nebraska Medical Center (UNMC) campus, and neighborhoods both north and south of Leavenworth Street. The initial alternatives examined for this project identify a preferred option that includes a multi-use trail bridge over Leavenworth Street at 39th Street. The southern approach of this bridge would connect to the Field Club Trail on the north side of Marcy Street. The northern approach of the bridge would be located on the south side of Jones Street at 39th Street. Anticipated construction activity may include, but is not limited to: utility work; grading; paving; construction of bridge span, abutments, and approaches; and lighting and landscaping improvements. The length of the proposed project is anticipated to be approximately 0.15 miles. UNMC would dedicate right-of-way and/or easements for this project and contribute the local matching funds for the project construction.</p>

2023-028 Sorensen Trail 72nd Street Underpass

This project proposes a trail underpass crossing of 72nd Street north of Sorensen Parkway following a former rail corridor. The NRD is currently working with CHI Health on development of a trail connection from the east side of 72nd Street up to Girard Street along the same rail corridor. This project would continue the trail from the east side of 72nd Street, provide a separated grade crossing,

Lead Agency	Fiscal Year	Phase	Fund Source	Total Cost	Federal	State	Local
and continue a trail connection to the north side of Sorensen Parkway near the intersection with 73rd Plaza. The underpass length is expected to be approximately 215 feet, with the trail connection being approximately 1,750 feet.

2025-004 168th Street & Harrison Street Corridors Improvements							
<p>The project will design the 168th Street corridor from approximately V to Harrison Street and Harrison Street from 157th Street to 204th Street using the City's Complete Streets process to identify the community's needs, context of the area, and identify safety issues that need to be addressed. We anticipate that this will include widening of 168th Street and Harrison Street as well as providing sidewalk and/or trail access to provide connectivity, as appropriate. This project will coordinate closely with Sarpy County's 168th St. Hwy 370 - Harrison St. project and the City's 168th Street project from Q to Center, which is currently being constructed. This project will further determine overall project cost needs for construction and help to write an application to apply for federal funds for a shovel-ready project.</p>

2025-014 NE-22995 Bennington Big Papio Trail

Bennington plans to connect to the existing pedestrian trail along Bennington Road with two bridge under crossings that will bypass traffic at both 156th Street and Bennington Road. The under crossings will require grading, retaining walls, concrete and handrails. Alternate “at grade” safe crossings will be needed to account for times where there may be high water in the West Branch of the Big Papillion Creek. The trail will follow the creek and be surfaced with concrete. Beginning at the existing trail at the Papio Creek bridge and proceeding south and east, it will end in downtown Bennington near the intersection of Warehouse and Stark Streets. Along the trail, a short pedestrian foot bridge will be needed to allow crossing over a deep drainage ditch. The majority of the trail is located within the city-owned Neumeyer Farm Parkland, our new 52 acre regional park and sports complex currently under development.

Lead Agency	Fiscal Year	Phase	Fund Source	Total Cost	Federal	State	Local
<p>The trail will be located along the West Branch of the Big Papio Creek in Bennington. It will start at the existing trail on the northwest corner of the Bennington Road Bridge over the creek and under-cross Bennington Road under the bridge. The trail proceeds along the creek and will also under-cross 156th Street at that bridge. After the undercrossing it will connect into the existing walkway on the 156th Street bridge to cross the creek and then follow the north bank as it winds toward downtown Bennington where the trail will end at the intersection of Warehouse Street and Stark Street.</p>

DRAFT

5.4 Federal Aviation Administration Projects

This section includes a listing of the airport improvement projects funded under the programs of the Federal Aviation Administration of the USDOT. Federally funded airport improvement projects must be listed in the regional Transportation Improvement Program. For that purpose, the following projects have been programmed by the Omaha Airport Authority.

Table 5.4 - Omaha Airport Authority Improvement Program (in \$1,000s)

<u>Fiscal Year</u>	<u>Project Name</u>	<u>Fund Source</u>	<u>Federal Funding</u>	<u>Local Funding</u>	<u>Total</u>
2027	Airfield Pump Station Rehab	FAA AIP	\$12,250.00	\$2,500.00	\$14,750.00
2028	Eppley Airfield Lighting Phase 2	FAA AIP	\$4,500.00	\$1,500.00	\$6,000.00
2029	Reconstruct Runway End 14R, Txy A	FAA AIP	\$17,100.00	\$5,700.00	\$22,800.00
		Total	\$33,850.00	\$9,700.00	\$43,550.00

5.5 Grouped Project Categories

MAPA utilizes the flexibility provided under 23 CFR § 450.326(h) to group projects “by function, work type, and/or geographic area” in the TIP based on the scale, anticipated environmental impacts, and/or regional significance of anticipated activities. Projects on these lists are constrained within the TIP based on available funding in a program year, but are not listed as regionally significant investments in MAPA's Metropolitan Transportation Plan (MTP) due to their scale and scope. Project groupings, types, and their relationship to the transportation planning process are included below.

Table 5.5 - Congestion Reduction Projects (in \$1,000s)

State ID	Lead Agency	Federal Funding Source	Phase	Federal Funding	Total Funding	Fiscal Year
Electrical Upgrades and Charging Stations Project						
	Metro Transit	CMAQ	UTIL-CON-CE	\$1,852.20	\$2,315.25	2026
			Total - Electrical Upgrades and Charging Stations Project	\$1,852.20	\$2,315.25	
Platteview Road, 132nd Street Intersection Safety Improvements						
	Sarpy County	CDS	ROW	\$0.00	\$65.00	2026

About MAPA

The Omaha-Council Bluffs Metropolitan Area Planning Agency (MAPA) is a regional Council of Governments. It was created in 1967 under the terms of an interlocal agreement to provide a forum for coordinating local planning and development activities. As an organization of local governments, we exist to help member governments address problems that are regional in scope and may cross jurisdictional boundaries.

MAPA has no regulatory powers. It can consider any matter which may or should involve interlocal governmental cooperation or coordination. It recommends, but does not implement, plans and programs that it prepares, reviews or adopts. It also provides review and comment on local applications for federal and state funds.

The Omaha-Council Bluffs Metropolitan Area Planning Agency (MAPA) prepared this report with funding from the U.S. Department of Transportation's Federal Highway Administration and Federal Transit Administration, and in part through local matching funds of MAPA's member governments. These contents are the responsibility of the MAPA. The U.S. government and its agencies assume no liability for the contents of this report or for the use of its contents. MAPA's Board of Directors will review this document for approval on June 26, 2025.
